The work this time has for really been along the line of securing the regiments of the Naval Unit in the appointment of the right kind of engineering students. Also registration at Techni-
college for the right kind of students in the Naval High School. The work will continue night and day, and all officials and students will have to give the best of their effort to secure the right kind of students in the future.

Since the barracks in the Technology Building are not complete, it is not possible to give the S.A.T.C. the necessary accommodations. It has been necessary to provide other quarters for the Naval Unit, and those men will be housed in the dormitories. The dormitories will be made available for housing students of Civil Engineering which will be transferred from the Naval High School to the S.A.T.C. These dormitories will contain about 300 beds, and will be ready for occupancy in a few weeks.
