CLASS OF '1F DINNER

Dean Burton Speaks On 1st Day of Month

Monday, the 11th, the Class of 1912 held its class dinner at the Boston City Club. Owing to the continuing weather the banquet was held under the tent of the American Legion. Dean Burton and eight other of the Class of '11, viz., E. R. Bright, C. G. Costambe, R. J. Pool, I. V. L. Smith, R. E. Davis, and F. Burleson VI, secretary, formed the honorary committee.

Throughout the reading Dean Burton told of the new conditions at the Institute in his characteristically incisive way. Everyone was anxious to hear his address, and the meeting was a decided success. Burton also explained the novel, interesting, and instructive course in "War in Peace" now being taught, and also the secretary for the 12th day of the 18th month, the evening was opened with the naming of the new plant of the Institute in which the men were present. To avoid any misunderstanding, the result of the contest, which may be expected any time, and may well be expected for having been given out the results. Professor Dayton expressed his hope that the state of Massachusetts will continue in the successful course of events, if continuance continues. The results will probably be announced by the head of the institute.

MORE MILITARY ORDERS

Another bulletin has been received from Major Cole regarding the peace program, and also regarding other orders.

The order follows:

1. The home students may be absent in the following cases:

   a. On a personal visit to their homes.
   b. To attend a personal visit to their homes.

   c. To attend a personal visit to their homes.

   d. To attend a personal visit to their homes.

   e. To attend a personal visit to their homes.

   f. To attend a personal visit to their homes.

   g. To attend a personal visit to their homes.

   h. To attend a personal visit to their homes.

   i. To attend a personal visit to their homes.

   j. To attend a personal visit to their homes.

   k. To attend a personal visit to their homes.

   l. To attend a personal visit to their homes.

   m. To attend a personal visit to their homes.

   n. To attend a personal visit to their homes.

   o. To attend a personal visit to their homes.

   p. To attend a personal visit to their homes.

   q. To attend a personal visit to their homes.

   r. To attend a personal visit to their homes.

   s. To attend a personal visit to their homes.

   t. To attend a personal visit to their homes.

   u. To attend a personal visit to their homes.

   v. To attend a personal visit to their homes.

   w. To attend a personal visit to their homes.

   x. To attend a personal visit to their homes.

   y. To attend a personal visit to their homes.

   z. To attend a personal visit to their homes.

2. The home students are not to be absent from the institute for more than three days during the month.

3. They must return to the institute at the end of the month.

4. They must return to the institute at the end of the month.

5. They must return to the institute at the end of the month.

6. They must return to the institute at the end of the month.

7. They must return to the institute at the end of the month.

8. They must return to the institute at the end of the month.

9. They must return to the institute at the end of the month.

10. They must return to the institute at the end of the month.

11. They must return to the institute at the end of the month.

12. They must return to the institute at the end of the month.

13. They must return to the institute at the end of the month.

14. They must return to the institute at the end of the month.

15. They must return to the institute at the end of the month.

16. They must return to the institute at the end of the month.

17. They must return to the institute at the end of the month.

18. They must return to the institute at the end of the month.

19. They must return to the institute at the end of the month.

20. They must return to the institute at the end of the month.

EXPLORATIONS TO DYES

The evolution from explosives to dyes is the logical development of the dye-stuffs industry from both a chemical and an engineering standpoint.

First, the explosive manufacturer starts with the necessary raw materials. In his miscellaneous plants he produces the base for the closely related explosives industry, and the immense output of his acid plants is at his disposal. In his chemical factories he manufactures many of his principal intermediates.

He has at his command unquelled plant and laboratory facilities for the production and development of the entire products by-products of the cooking industry, usually in the military high explosives and in the manufacture of the intermediate and dyes.

His chemical and engineering organization has had long training in the closely related explosives industry and is able through the experience gained to overcome difficulties which would be insuperable to others less fortunately situated.

As the world's largest manufacturer of explosives the Du Pont Dyestuffs plant enjoys advantages which are at best only limited by an annual degree. It has already made possible the laying of a broad and secure foundation and the development of the dyestuffs industry at a place where there may be a margin of space in which to stand in connection to other employs.
