The new heavy weight Winter Overcoats are made from the finest foreign and domestic fabrics, carefully selected and splendidly tailored.

J. P. MURRY SPEAKS
(Continued from page 1)

American engineers in building rail-roads, factories, warehouses, etc. in France, Belgium, Poland, and Serbia must be regarded as the most important. Some of the miles in France will require three years' work, before raising can be resumed, because of the destruction wrought by the Huns. The disbanding of wounded soldiers must, he said, be rightly accomplished. Men must be returned to their former position and given an opportunity to attain a better education. Men injured in the industries must be cared for by the Federal and State governments in co-operation with the employers.

Mr. Mawson then discussed the problem of reform with which we are faced. Democracy must be made safe for the world, by a free ballot system, the responsibility of the executive to the legislature, the introduction of a budget system, and equitable taxation in all forms of government.

Summarizing, he went on to say, is the need and biggest of our present-day problems. This has been a Socialist war; the draft, conscription, finance, the control of the railroads, telephones, telegraphs, and cables, price fixing, and the control of the railroads are the dreams of the future, but, he explained, do not include the control of the railroads.

"There is no one to control the world, aside from the fact that many men will remain at the Institute to finish the term and by so doing would be forced to pay their own way home, Admiral Byrd, commandant of the Base, was able to arrange for a discharge of all transportation in and to the Technology used up to midnight on December 21."

FATE OF S. A. T. C. BARRACKS NOT AS YET DETERMINED

For some time rumors have been current as to the disposal of the S. A. T. C. barracks on the tract property. Among the different ideas that have been advanced, two seem to have been decided upon.

One is that some of the barracks, at least, will be kept and will be used as activities buildings. The other plan is that the U. S. Naval Aviation Detachment is to be housed in the barracks at least, will be kept and will be used as activities buildings. The other plan is that the U. S. Naval Aviation Detachment is to be housed in the barracks at least, will be kept and will be used as activities buildings.

Work of dismantling the barracks has begun again. The beds and mattresses which are no longer being used are being sent to the quartermaster department of the S. A. T. C. It is expected that the barracks will be used as retreats for the men who have been discharged. The men are employed on December 21.

THE SAVING IS INCIDENTAL

The big advantage in craftsmen Fabril- koid luggage is that it stays new. Its surface is impervious to grease, grime and dirt. It does not scratch, peel or wear shabby. As handsome as luggage can be,—it retains its beauty through long service. Snow and water remove all the stains of travel.

Do not hesitate to buy craftsmen Fabril- koid because the price is moderate but do not buy unless you see this stamp on the bottom.
