Chemical Warfare in the Great War

The present article has developed the history of chemical warfare, from its early use in World War I to its current strategic and tactical importance.

Cambridge, Mass., Dec. 28, 1918

Published in the New York Times

In an effort to counteract the effects of chemical weapons, the U.S. Army has been developing and employing various defense mechanisms, including gas masks, decontamination equipment, and countermeasures against nerve gases.

Military and Civilian Standards

The Institute of Standards and Technology is working on developing a unified system of standards for chemical warfare agents and countermeasures.

New Features in Registration Will Include Extra Card

Schedules for Registration will be Approved by Professors in Charge of Courses—All Causes for Delay Eliminated

CLASSES WILL START MONDAY

Registration for the second term at the Institute will begin as previously announced on Saturday morning, December 28, and will be completed only after all the regular registration material has been received by the Registrar. Given the nature of this term, this has been handed in to a representative of the particular class for which the students are registering.

In addition, another feature to facilitate a prompt start on academic work, each student will be required to submit his enrollment card for his representative to the Registrar. By this means, the men will be able to start work at once with a reasonable degree of certainty that their schedule will not be later changed by disapproval. It has been announced, however, that the approval of the course representatives cannot be considered as absolute.

Elections Open

Nomination Starts Monday December 30 and Close At Noon January 6

The Committee on Ungraded Activities has recommended the resignation of all the men who were elected last spring, and is now urging upon the students the necessity of selecting new members.

Price Three Cents

The following regulations, which include any new card, is for the benefit of all students.

The picture gives an impression of the American club of Technology. The banner of the United States Navy was prominently placed at the naval reserve force headquarters.

A word of explanation is required for every student, as the regulations do not apply to every class. The American club of Technology is an organization which pays rent and fees for its meetings.

Opening-Date

The opening date for the second term at the Institute will be Monday, January 6, and students will be required to attend the library laboratories and work for the first time.
