HOCKEY DUEL WILL BE STAGED TODAY

Atkinson and Runkle Will Knock at Each Other’s Slats in Effort to Uphold Honor, McNell
Formerly On Arena Team To Star

EVENTS STAGED FOR 1:20

Atkinson and Runkle have at last decided to have the much talked of duel between them. The game is to take place about three o’clock this afternoon at the weather and ice permitting, is the time set for the contest. General consensus has it that this game promises to be as lively as it will be interesting, since there is great rivalry between these teams, and also as there is at least one star on each team. Besides this, Atkinson has to live up to her reputation of never having been beaten in hockey.

ALL HAIL THE V.O.O.D.

Technology’s Comic Paper Again Comes Into Linelight
Under New Name

Now that the B. T. C. has ceased to be an arrangement for the student body, the Voo Doo will undertake to fill the position in the undergraduate life at the Technological Institute. The first meeting was held last week, and since the announcement of the change of name of the Voo Doo the magazine has come to the fore. It is expected that the magazine will go up to the highest expectations of everybody.

DISTRIBUTED VISITOR PROPOSES INSTITUTE

Dr. Ettienne Bernet, member of the French Educational Commission, touring the country, spent last few days in the Institute laboratories under the direction of Mr. F. W. Withrow, president of the institute, discussing the work of the Institute.

The purpose for which it is used. Being practically free for men who have had this privilege,

Brenton students at the Institute who have presented personal checks at the Nurses’ office to effect the disbursements of ‘No potential check holders’ have been given.

For this reason the outside, students, that the men should not be asked to do work which should be done by the women, and that there should be no overlap of duties. It is decided that the women should be a president, a vice-president, a secretary, and an executive committee consisting of three members. The meetings are held at 7:30 o’clock in the ‘Little Bank’, which is under the sponsorship of the attic and will be printed in THE TECH within a month.

The magazine is composed of six departments: editorial, ad- vertising, art, distribution, and publicity. As an example of the type of life, this one is representative. The pictures are excellent, and the stories are interesting and entertaining. The magazine is well written, and no disclaimers will be made as to its quality. Being a new magazine, there are hardships and difficulties, but they will be surmounted by the perseverance of the writers. The ‘Voo Doo’ is an excellent record of progress with some of the other departments.

The magazine is written by the members of the Institute, and the faculty as well. The purpose of the magazine is to promote interests.

The magazine is the production of a non- profit organization, and the purpose is to promote the welfare of the students. The magazine is well written, and no disclaimers will be made as to the quality. Being a new magazine, there are hardships and difficulties, but they will be surmounted by the perseverance of the writers. The ‘Voo Doo’ is an excellent record of progress with some of the other departments.
