The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:

1. A new course in renewable energy.
2. A new course in environmental science.

The committee further recommends that the following cuts be made:

1. Reduction of $5,000 in the allowance for research.
2. Reduction of $2,000 in the allowance for equipment.

The committee also recommends that the following new programs
be established:
