BASKET BALL AT LAST

It is with much pleasure that we can announce that basketball is at last with us. The need for a place to play basketball was as great as they claimed. There are many who are interested, however, there will be no 'Varsity team.

The project includes one of the largest racket courts in the world, with a total length of 240 feet.

About 150 feet for ladder play, in advance. Single soccer three times.

Although overpayments may be published unsigned if so requested, the names of the writer should be printed, however, for the sake of credit and for reputation.

Copy for Wednesday's issue of THE TECH must be in the hands of the Editor by Wednesday before 11:00 a.m.

WHETHER or not the war on the whole has benefited humanity, there is no doubt that it has, however, left many a man a physical and mental cripple, to whom it is physically as well as morally a valuable return to any real man.

In most colleges the students may display their fighting spirit in football, baseball and other similar pastimes. Unfortunately, scholar students have not the chance to develop these interests in the colleges. There are, however, a number of colleges open to all, with which the students may compete with the others in the Association. This action was taken by C. R. H. Smithwick, the assistant editor of the Boston, Mass., under special invitation from the Eastern Intercollegiate Athletic Association, which has reached its final form. It is also proposed to allow the Springfield College and the University of Pennsylvania to participate in the national championship. Many others have already proved their worth in the national championship, and under the guidance of these men the show can be safely and usefully practiced. But to Technology at the present time it offers special advantages because we have men who form the foundation upon which to build a housing team. One of these men is Professor Folinbee, Jr., and is now in possession of the Lafayette Kinsey, as stated.

One of these, almost neglected in the past, which touches upon points without which the true athlete and the man of action can find no place in the popular but misguided conception, is the use of the sports clubs. These are almost the only students who are capable of taking part in them.
