MORE CARTOONS WANTED!
BY VOODOO ART STAFF

The second issue of the Institute's new publication, "Voodoos," will be released on the first day of next month, according to the editors-in-chief, who will contain many new and improved features.

Please have been completed for a better and more complete theatrical section, which will include reviews of shows, playing in Boston, as well as pictures of the casts of the shows in the current era. Many drawings and cartoons are scheduled for publication in Volume IV, which it is expected, will be a considerable improvement over those in Volume III. The number and the board requests that all men in the Institute who have any material for these should turn it in to the office.

HOW ABOUT THESE STORIES?

In response to the request of the Aeronautical Information Branch of the Army, which was published in the "THE TEC" last month, several stories of the personal experiences of members of the Air force have already appeared in this issue of the Air Service News. Mrs. George already has quite a collection of interesting anecdotes. The director of Military Aeronautics urges that all men who are interested make or as little as the way of personal sketches about their experiences in the air. As a result of these stories as well as possible. All institute men who have been in the Air Service overseas should turn in their stories to Professor F. E. Rogers in room 2-275.

AVIATION STORIES WANTED

Information is in the letter below may be given to Mr. E. F. Rogers in room 2-275, who is collecting the material for the government.

To the Students of Technology:
The Director of Military Aeronautics asks your cooperation in the following request, which is in line with the Air Service of the country and which may be of yet more intimate concern to you. Men who have been in the military service as crewmen in steam power stations, hydroa
developments, transmission lines, bell and interoffice connections, etc., are invited to furnish industrial plans and drawings.
