Men with a Purpose

The things that ABERTHAW builds are not put up for play. Factories, storerooms, power plants, shipyards—each piece of this Company's work constitutes a producing element in the wealth of the Nation. Each must be designed to fulfill a need completely foreseen. Each must be constructed so ably, so honestly, so economically that, when the finished plant begins to operate, its output will be increased with no unnecessary costs due to the builder's mistakes.

Meeting these requirements is serious business for serious men; men who are trained to their task, who value reputation above immediate advantage, and among whom honesty is not merely a company policy but a personal code.

The growth of ABERTHAW during a remarkable quarter century is due to the steadfast effort of such men. Today the Company is always glad to place its expanding organization for others of similar promise.

Correspondence from graduating engineers who can meet the specification is invited.
