First Aero Meet Held
(Continued from page 1)

The first of the single-seat machines was the Liberty, a neat little biplane with a 75 h.p. Liberty engine and the necessary accessories. The machine was made by the Liberty Engine Company, and the famous car was a product of the same organization. The other machine was the Curtiss, a 60 h.p. biplane with a 50 h.p. Liberty engine. The machine was made by the Curtiss Aeroplane Company, and as far as we know it was the first machine to be built in America.
