CHEMISTRY FELLOWSHIPS

(Continued from page 3)

The holder of this fellowship will be admitted to the work of the department in radio chemistry and will acquire every opportunity and encouragement toward independent research in this subject. Applications must be received by April 10 and addressed to E. H. Stimson, Director of the Chemistry Laboratory, Institute of Technology, Cambridge, Mass.

Everett, Mass.

The Department of Chemistry at Princeton University wishes to announce that there are a number of scholarships and assistantships in the departmental fields of study for the coming academic year 1926-27. For the coming year there will probably be approximately ten assistantships in General, Inorganic, Organic, Physical, and Analytical Chemistry, and also in Qualitative Analysis.

At present the following regulations govern the appointment, tenure and salary of instructors in Princeton University:

1. Each must be designed to fulfill a need comparatively foreseen. Each must be constructed so pietely foreseen. Each must be constructed so

2. The things that ABERTHAW builds are markable quarter century is due to the steadfast

By and For

MEN WITH A PURPOSE

The things that ABERTHAW builds are not put up for play. Factories, storehouses, power plants, shipyards, such pieces of this Company's work constitutes a producing element in the wealth of the Nation. Each must be designed to fulfill a need completely foreseen. Each must be constructed so

Meeting these requirements is serious business for serious men; men who are trained to their task, who value reputation above immediate profits, and among whom honesty is not merely a company policy but a personal code.

The growth of ABERTHAW during a remarkable quarter century is due to the steadfast effort of such men. Today the Company is always glad to make place in its expanding organization for others of similar promise.

Correspondence from graduating engineers who can meet the specification is invited.
