LAW
 AND AMERICA'S
 WORLD POSITION

America's new place in international politics and commerce challenges the young American.

He must equip himself for new world conditions with a knowledge of legal fundamentals.

LAW—its principles and application to all business is almost as necessary to the coming business man as it is indispensable to the lawyer.

Qualify for real leadership.

**THE BOSTON UNIVERSITY
 LAW SCHOOL**

gives a thorough training in legal principles.

Underwood Talks On Sponge Fisheries

Floating along the shallow waters of the south coast of Florida with one's head thrust in a glass-bottomed bucket while searching the depths for sponges was one of the phases of this industry told by Professor W. Lyman Underwood, well-known lecturer on natural history. The lecture was given before several members of the faculty and about fifty students of course VII.

The lecture on "Sponge Fisheries of the East Coast of Florida and Vicinity" was illustrated by hand painted lantern slides. He also showed several pictures of the Key West viaduct and other features of southern Florida, remarking that photography of nature had been his life hobby.

Speaking of the sponge fisheries Professor Underwood stated that all such expeditions are conducted in dories towed by sailing craft, and that the sponge fisher sits in the stern of the dory scanning the bottom of the ocean through his glass-bottomed bucket. As soon as he sees a sponge, he cuts himself loose from the large craft and means of long poles, managed with great dexterity after years of practice, fishes up the object which he then places on the deck to dry. During this process, while the organic matter is undergoing decomposition, the disagreeable odor may be noticed on hot days over a considerable distance around the "spongers." After drying there remains only the process of washing before the sponge is ready for the market.

**TECHNOLOGY RIFLE TEAM
 TO MEET HARVARD MAY 1**

Technology's Rifle team will meet Harvard May 1, in a dual shoot the place of the meeting to be announced later, as well as the names of the men who will make up the team.

The result of next year was as follows:

Perkins, 1917; Kearney, 1917; Hayes, 1922; Brambach, 1911; Clark, 1901; Skinner, 187; Levine, 184; Nodke, 183; Powers, 172; Silver, 172; Team Total, 967.

The same team will compete in next years five, six, seven and eight.

PROFESSOR FRANKLIN IS ILL

Professor Franklin of the Physics department was operated on for appendicitis Friday, April 18. His condition is now progressing favorably and he will in all probability be about again in two weeks time.

ELECTRICALS PAY VISIT

(Continued from page 1)

and by a simple manipulation of switches either direct or alternating current up to 550 volts in potential may be obtained for testing or for laboratory research work. In addition, when alternating current is used, and frequency from twenty-five up to as high as 1000 cycles may be generated. The value of such a piece of apparatus is quite obvious, as motors of all types are manufactured at the plant.

Many comments were made on the ingenious machines in the machine-shop. One of these was an automatic lathe used to cut out complete motor shafts at a high rate of speed. Other machines were similar to turret-lathes except that they possessed multiple turrets and could turn out several pieces of work at one time.

Due to the present strike of Telephone company employees, the management of the society is doubtful as to procuring Mr. Taylor as a speaker at present. However, it is expected to have an illustrated lecture by Colonel Pritchard of the Signal corps who will describe the apparatus and methods used by this section of the army. This event will occur in the latter part of this week. The exact evening and hour will be announced later.
