

TIME OF TECHNIQUE RUSH APPROACHES

Students to Brave Injury and
Death to Obtain Autographed
Year Book — Special Hospi-
tal Service Promised

THURSDAY IS DAY SET

Once more Technique Rush will take its stately position as forerunner of Junior Week and once more thereby the Institute will have an opportunity to rid itself of many students, desirable or otherwise, and relieve the state of over-congestion now existing. Once more will daring and death-defying students struggle in a brave attempt to get one of the copies of Technique 1920 which has been autographed by President MacLaurin. And finally, once more will the weird strains of agony issuing from the queer instruments of Technique Band urge to madness the contestants in the struggle, the musical attempts vying even with the close harmony of this year's ballet music for Tech Show. Perhaps the reason that there was very little murder and but few injuries in last year's rush was due to the fact that the band did not play, but its presence this year will restore the name of Technique Rush as the most bloody event of the Institute's annual activities. To this end, as in other years, several experienced nurses and veterinary surgeons have been procured to give first-aid to whosoever may need it, and indications point that this corps of doctors will not be without work.

As far as concerns the situation of the rush, it will be held in the Great Court, dear to the memories of the Sophomore class by virtue of the days spent there in physical training; the pebbles will but serve to further the suffering of the unlucky ones at the bottom of the pile—but that is a mere detail. Grease, sulphur fumes, fresh paint, and innumerable other features without which no rush is complete will be well in evidence as in last year, to further torment the fated souls.

Arrangements have been made with the Institute Committee so that these have paid their student tax may call upon the Institute physician for first aid after the rush. Books for these men who are seriously injured will be delivered at the hospital.

Bugle calls will be used for the preparatory signals, while a pistol shot will give the final signal to start and to stop. One minute will elapse between the first shot and the time that

CHEMICAL SOCIETY VISITS FACTORY OF CARTER'S INK CO.

Thirty men from the Chemical Society had the privilege of visiting the factory of the Carter's Ink Co. in Cambridge last Tuesday and Wednesday afternoons. The number on each trip was limited to fifteen men.

The men were conducted through all parts of the building, and saw all departments at work. They first visited the rooms where the raw gum arabic and nut galls are brought in, and saw the processes of the purification of the gum arabic for glue, and the manufacture and dyeing of ink and typewriter ribbons. After they had seen all the manufacturing processes, they were taken to one of the most interesting departments in the factory, the filling and packing room, where the bottles are filled with glue and ink, and packed for shipment.

CLASS ELECTIONS COMING SOON

Nominations for all class officers and committees, and signed by ten members of the nominee's class, must be turned in at the Information Office by Thursday, May 29. The officers to be elected in each class are: president, vice-president, secretary, treasurer, two members of Institute committee, two members of executive committee.

MILTON A. LOUCKS IS CHOSEN TREASURER FOR THE TECH

The special course of competition for the treasurer of THE TECH has been completed and the treasurer and assistant treasurer have been chosen. As a final to the course in business management started last period and ended this year, an examination was given to those who wished to compete, and the highest men were picked for the positions of treasurer and assistant treasurer. Milton A. Loucks '18 was chosen treasurer, and Oswald W. Cammann '19 was chosen assistant treasurer. The former becomes automatically a member of the managing board of THE TECH.

WEEK IS VICTORIOUS ONE FOR FROSH CREW

Eight Defeats Middlesex and Tufts Varsities by Comfortable Margin—Row in Harvard Regatta and Win

SEASON NEARS END

The freshman first eight added two more victories to its list this week. On Monday they defeated Middlesex and on Thursday, Tufts was its victim.

The Middlesex race was rowed over the half mile course above the Stillman Infirmary on the Charles. It was Technology's race from the start and the Institute crew finished four lengths ahead of the Concord aggregation. The crew which entered the race was practically the same as in previous races. It was as follows: Falls at bow, Horne, 2; Driscoll, 3; Molinar, 4; Bretting, 5; Osborne, 6; Captain Hemenway, 7; Bryden, stroke, and Follinsbee taking Remsen's place at cox.

On Thursday afternoon the same crew met Tufts and rowed a mile against them for a two length victory. The weather was good for racing and the eight was able to use its usual long, strong stroke. The race was well rowed with Bryden at stroke and Falls at bow showing the best oarsmanship. After the race precedent was carried out by throwing Follinsbee, the cox into the river.

This afternoon our first freshman

TALK ON CHILI

Dr. Molina Addresses Latin American Club and Faculty

One of the most instructive lectures this term was given on Thursday evening in Smith Hall by Dr. Enrique Molina, President of the University of Concepcion, Chili. The lecture was given before a large audience consisting of members of the faculty, members of the Latin-American club, who invited the speaker, and a number of students. Dr. Molina was sent by the Chilean government to study the best modern methods of North American universities with a view of adopting them in the Colegio de Concepcion, Concepcion, Chili, of which Dr. Molina has been made the first president. Dr. Molina has already lectured at the Universities of California and Columbia, and is leaving Boston for a further trip to other American and Canadian cities.

The lecturer took up the geographical aspect of Chili, and then gave a very interesting discussion of the political history of his country. He told of the conquest of Chili by the early settlers, and the subsequent struggle for independence from the onerous Spanish yoke. He told of the Chilean form of government, and mentioned that it was a pattern of the American system, with the exception of the method of choosing the cabinet, where the British method is used. The speaker then discussed the educational problem, and told of the high quality of the secondary schools, as described by various authoritative Americans. His description of Chilean art was illustrated by lantern slides of important works of art, and of some of the largest cities.

MAY SWIM OVERSEAS

Two Institute Men Recommended to Represent U. S.

Sidney M. Biddell, '22, and R. H. Skinner '21, of the Technology swimming team will be recommended to the committee of the Amateur Athletic Union which has charge of picking the American team to compete in the Inter-Allied Athletic meet in France this summer, as candidates for the swimming events.

The final selections for the team to represent the United States will be made in New York on Tuesday of next week. If the two Technology men are picked they will leave with the American team on June 9.

Joseph F. Conway, first vice-president of the A. A. U. and President E. E. Barb of the B. A. A. are responsible for submitting the names of the Institute men to the championship committee. If selected, Biddell will enter the 100 and 150 meter swims, and Skinner the diving events.

PROM SIGNUPS MUST BE REDEEMED TODAY

Committee Has Decided That No Flowers Will Be Worn at the Prom—Chaperons Must Have Tickets

ALL ARRANGEMENTS COMPLETED

Almost all the Junior Prom signups have been redeemed, but the committee wishes to take this opportunity to advise the men holding signups that to-day is the last day for their redemption. Members of the committee can be found at the booth just off the main lobby between one and two who will sell Prom tickets for five dollars to men holding signups.

The Prom Committee has decided that flowers will not be carried this year and it is hoped that all men attending will conform with this decision. The committee wishes again to call the attention of the men bringing chaperons to the fact that chaperon's tickets are necessary, and can be procured from any member of the committee for two dollars. Dance orders will be given out the night of the Prom.

T. C. A. FILING IS UNIQUE

Students Urged to Send Records of Their Doings

Excellent work is being done by the Technology Christian association in its effort to make and keep up to date a record of each man at the Institute. Mention has already been made of the filing of the activity cards but few know exactly how the scheme is going to work.

On each man's card there will go along with his name, class, course and address, the name of his prep school or college and his activities while in school. Then under the head "Activities at Technology" will be included membership to any fraternity, professional society, athletic team, or other activity. These cards will be revised whenever opportunity presents itself, a special secretary being employed for this work.

Whenever a man's achievements are as noteworthy as to receive recognition from the publications at the Institute then the T. C. A. will make the fact known to the press of his home city and a complete record of the man will also be sent. It should be noted that a separate file is kept only of men who are candidates for some form of activity.

All students who are engaged in some activity and who do not fill out cards will find it to their disadvantage. As yet about fifty cards have been completed and filed.

ATHLETES COMPETE HERE TODAY IN NEW ENGLAND COLLEGIATES

Technology, Bowdoin, Brown, and Wesleyan Have Strongest Entries—Institute's Prospects Dimmed as Bawden Limp Around Cinders

ROLLINS EXPECTED BIG POINT WINNER

It is not certain that "Mich" Bawden '21, will run in the N. E. I. A. A. track and field championships to be held this afternoon on Tech Field. With Bawden out of the running Technology's chances for winning the meet would be decidedly lowered. Bawden reported for practice on Tuesday afternoon but was able to do only a jog on account of his ankle, which he sprained over two weeks ago while practicing in the high jump. In the opinion of Coach Kanaly, Bawden will be slowed up considerably, if not unable to run.

BOXING CLASS WILL BE HELD IN SUMMER

Mr. Boutillier Hired as Coach—Novice Tournament and Finals of 158-Pound Class Will Be Staged at Next Smoker—Winners Get Cups.

MEDALS ARE OFFERED

With the approach of warm weather, arrangements are being gradually completed for the summer boxing class. Mr. Boutillier, the present coach, will continue in the same capacity for six weeks. The course will begin at the opening of summer school and will continue till the first week in August. A large number of men have signified

MR. FRANK BOUTILLIER

their intention of taking the course, which will be held out doors two or three times a week, and from present indications the fee will be very low.

To arouse interest in the summer boxing class, it has been decided to award medals to the winners in a tournament towards the end of the course. Mr. Fitzpatrick, the donor of the four handsome cups presented to the champions on field day, is presenting these medals, as well as three more to be given to the winners of a tournament for novices of the 125, 135, or 145 pound classes to be held in the near future. This novice tournament will probably be held at the next large smoker given at the Institute, and the winners of the Field Day cups will be barred, the intention being to give anybody a good chance to win, and a large entry is expected. As a grand climax to these bouts, Brokaw '22 and Rosenfield '21 will fight off the finals in the 158-pound class which were postponed

(Continued on page 4)

An exceedingly large attendance is expected at the games this afternoon. The stands which alone will hold about 1500 people are sure to be filled, with crowds lining the fence the length of the field. Last year Technology made a clean sweep at the games and had a winning score larger than the combined scores of the other competitors.

Allen '22 since last Monday has reported for the high jump again and will be in that event today. Ash '20 is not

TECH SHOW TICKETS NOW ON SALE IN LOBBY

Blouke Wins Poster Competition—Program Cover Drawn by Bowman '19—Preparations for Show Practically Completed

MUSIC IS CAPTIVATING

Tickets for Tech Show will go on sale in the lobby Saturday noon. Reservations were completed Friday evening and men who have them may get their tickets then. The tickets will be held here at the Institute until Monday at 6.00, when they will be sent to Herrick's at Copley Square. Reservations may be made there, by telephone, where they will be sold at box office prices. On the day of the Show, May 31, tickets will be sold at the box office at the Hollis St. Theater. The tickets for the Somerville performance can be obtained at Davis Square at the box office of that theater only.

The Tech Show poster and program cover are thought to show exceptional artistic qualities. The poster, which was drawn by Pierre Blouke, 1919, has an unusually good color scheme. It is hoped that the replica of the show

(Continued on Page 3)

CALENDAR

Sunday, May 25

9.30—Full dress rehearsal of the Tech Show.

Monday, May 26

10.00-5.00—Individual indoor match. Shooting in prone position.

5.00—Professor Rogers will speak on journalism at the meeting of THE TECH news men and candidates. All must be present.
