RIVERBANK COURT HAS FIRE

Fire due to a defective electric wire caused damage estimated at \$40,000 to Riverbank Court on Massachusetts avenue opposite the Institute, Sunday morning. Upward of 400 tenants and guests incidentally were driven from their rooms.

Two alarms were sounded but the fireproof roofing prevented the flames from reaching the apartments below, and the fire was quickly extinguished. The damage was chiefly from water.

SOLVES A VITAL PROBLEM OF THE CONSTRUCTION ENGINEER

Rust, the foe of all iron and steel construction, works slowly but surely to a climax—the destruction of valuable property and the endangering of human lives.

The solution of this problem is a simple one—based on the selection of Harrison's Antoxide made up of rust inhibitive pigments incorporated in a varnish vehicle.

This product produces a smooth, high gloss finish that is highly waterproof, thus protecting against rust and also retarding the corrosion where it has already begun.

Antoxide will afford the protection necessary in fighting the "Flameless Fire," ensuring permanent structures with the greatest safety factor.
