

## DECIDE TO PUBLISH THE TECH FOR THIRD CONSECUTIVE SUMMER

Makes Technology Supreme in Collegiate Journalism  
With Only College Newspaper to Run on  
All-Year-Round Schedule

### CANDIDATES SOUGHT FOR NEWS STAFF

CONTINUING the policy which it has pursued the last two years, establishing itself unique in the realm of collegiate journalism, THE TECH will publish throughout the summer months, putting out one issue a week—that on Wednesday. The summer schedule will start next week.

The paper will be the same size as that published now. Its news columns will be devoted largely to Alumni News, doings of men at the Institute, stories and pictures from the Summer Surveying Camp at East Machias, Maine, and personals of undergraduates working in the shipyards.

This is the third consecutive summer THE TECH has published. It is, as far as is known, the only college paper not to suspend publication during the vacation months. The fact that Technology is now and is becoming more so all the time an all-the-year-round school demands that the editors make it their policy to give the school a newspaper all-the-year-round.

The large alumni subscription list is another factor which has favored publication in the summer time. With junior freshmen classes going on at the Institute practically all summer, these augmented during the first part of the summer by students from other classes making up work lost one way or another, and the consequent activities of these men, demand an official mouthpiece, through which to speak to the alumni of undergraduate doings.

No better way has yet been found of keeping a record of the work of men at the summer camp than through publication of their work in THE TECH. Last summer work in the shipyards was organized to such an extent that each shipyard was in part a miniature summer camp. This year will be much the same for while the work in the shipyards is not officially organized, many men are planning on returning to the occupation which last year netted them so much pleasure, experience and monetary reward.

Many of the men who are at present working on the news staff of THE TECH are expected to be here, available for work during the summer. Some, however, will not be able to give their time to the work while others will not be here at all. This means that only a few are left to take care of the publication, the gathering of news, etc.

These few must have help and that help can only come from undergraduates who are studying at Technology this summer. It is the desire of the managing editor that any men who will be at the Institute this summer and who can be of assistance in the way of collecting and writing news would call at THE TECH office in the basement of Walker Memorial any day during exam week at 12 or 5 o'clock and speak to him there.

Here is a most excellent opportunity not only to get out for some activity and enter into Institute life, but also to get some practical experience in writing and in talking to men. It is not necessary that a man have newspaper experience before he come out for THE TECH. A willingness to learn and a little persistency are all that anyone needs.

Men who avail themselves of this opportunity to affiliate themselves with THE TECH news staff will be most excellently fixed in the fall. They will be given every advantage over those who enter next October. According to a new policy recently adopted by the managing board, no man can become a night editor in the future unless he has worked for at least a year on THE TECH. The distinct time advantage to be gained by coming out in the summer must be quite clear.

### HOURS OF MEDICAL ADVISER TO BE CHANGED FOR SUMMER

With the return of Dr. Rockwell to the Institute, the hours of the Medical Adviser are to be changed, as it is thought that the number of students attending the Institute his summer will not warrant the opening of the office every day. Beginning Monday, June 23, and continuing throughout the summer the hours will be from 4.30 to 5.30 on Mondays, Wednesdays, and Fridays.

## TECH SHOW BANQUET IS GREAT SUCCESS

Speakers Discuss Prospects For  
Next Year—Enthusiasm Runs  
High When Members of Cast  
Review Songs

### MARKS MAKES FAREWELL SPEECH

If it had only been an ordinary banquet, the kind at which post-prandial speeches are bared spelled differently, it might suffice for the reporter to say that "everybody connected in any way with Tech Show 1919 was the guest of the show management at a banquet at the Hotel Lenox Thursday evening." Perhaps he might even add baldly that about one hundred twenty-five men attended.

But this was no ordinary affair, this Tech Show 1919 banquet. Percy Marks told those who attended that to say the show was fine would be trite. It's the same way with the banquet. No adjectives are superlative enough to tell THE TECH readers just how good it was. No cold, terse, Associated Press-like report will serve here.

Starting when Earl Collins finished his fruit cocktail and went over and sat down at the piano and played "The Only Boy," thereby giving the crowd the cue to yell for Freddie Britton to sing, there was something doing every minute until some few hours later Eddie Ryer, General Manager of Tech Show 1919, announced that "that's all there is, there isn't," etc.

As mentioned above, Earl Collins started the ball rolling right after the cocktails. Freddie Britton needed considerable teasing before he consented to favor the gathering with a song but finally someone a little bigger than Freddie—this someone was hard to find—boosted our giant Betty up onto his chair and assisted by Bill Howard with a knife for a baton. Freddie told us in song just as he told five audiences over the footlights a couple of weeks or so ago, just what kind of a boy was "The Only Boy for me."

Mr. Howard—occasionally we shall give him the honorary prefix despite his admonitions—was roundly cheered when he arose to direct Freddie's singing. He handled the knife-baton quite in his own, masterful fashion but his left hand was having trouble juggling the ever-

### CHANGES ARE MADE IN STAFF

Professor D. C. Jackson of the Department of Electrical Engineering, returned to the Institute on June 7, 1919, and Professor W. H. Walker, of the Department of Chemistry and Chemical Engineering, returned on June 3, 1919. The following appointments have been made: Miss Dorothy Bell, Librarian, Vail Library, beginning June 1, 1919; Kenneth E. Bell, Research Associate in Applied Chemistry, beginning June 2, 1919; Stanley L. Christolm, Half-time Research Assistant in Applied Chemistry, beginning May 15, 1919; T. E. Shea, Research Assistant in Electrical Engineering, beginning June 23, 1919. The following resignations have been accepted: Miss Helen Almy, Librarian, Vail Library, effective June 1, 1919; A. F. Murphy, Research Assistant in Electrical Engineering, effective May 15, 1919; A. A. Prior, Research Assistant in Electrical Engineering, effective May 24, 1919. Leave of absence has been granted to Professor W. T. Sedgwick, Head of the Department of Biology from May 1, 1919 until the beginning of the next academic year and to Francis A. Brown, instructor in Forging from May 31, 1919 until this Fall.

### WIRELESS SOCIETY ENDS THIS YEAR'S ACTIVITIES IN BANQUET

Lt. Murray Speaks On Topics of Interest to Radio Men

At this time of the year it is customary for many Institute activities to end the year with some sort of function which will afford its members one last memory over which they will dwell during the summer and which will leave things to be looked forward to in the coming year. Not least among these was the Wireless Society Banquet, which was given last Wednesday evening at 5:30 in the North Dining Room of Walker Memorial.

After the dinner, the members drew back their chairs and settled down to listen to the talk given by Lieutenant Murray, the principal speaker of the evening. Although his talk covered many topics of interest to the radio man, he spoke mainly on the kind of books one interested in wireless should have, keeping in touch with the work through magazines, and new types of stations and apparatus. When this talk was concluded each member of the club was called on to give a two minute speech which consisted of either a joke, a suggestion for the benefit of the society, or a statement of what the society had done for him. It was expected that Mr. Emo Andrew would speak but he was unable to attend.

Future plans were discussed informally. In so much as it is expected that the sending field will be opened to amateurs in about a month the work of the society will be continued through the summer with H. M. Lane '21 in charge. The meeting ended at 8.30.

## FRESHMAN BALL TEAM HAS DIFFICULT SEASON

Deserves Credit in Spite of Five  
Defeats—Clarke, Kerr, and  
Captain Smith Star for Freshman Team

### LACK OF COACH IS FELT

At the first call for candidates for the 1922 baseball team, on April 11, about fifty men came out, and all signs pointed to a very successful season. H. R. Smith had previously been elected captain on account of his experience as a pitcher on the Worcester Academy team and D. E. Walsh had been chosen manager. Manager Walsh had games scheduled with Winthrop High, Andover, Exeter, Harvard '22 and Worcester Academy. The need of a regular coach was keenly felt, and it was hoped that some interested member of the faculty would be able to supply the lack, but the place was later filled by Mr. Nash, who was captain of the Harvard baseball team last year.

The season opened on April 15, with a team from the Provost Guard stationed at the barracks behind the Institute. Kerr, the freshman left fielder led off with a home run in the first inning, and Smith's work in the box with seven strike-outs to his credit, made it an easy 9-1 victory for 1922. The games scheduled with Winthrop High and Milton High were cancelled by those schools, and the next game was on April 23, with Phillips Academy at Andover. The team played good ball for the first seven innings, particularly in the infield, and held the school-boys to the small end of a 1-0 score, but in the eighth Andover took a brace and scored five runs, defeating the freshmen 5-1. Clarke starred for 1922, both on third and at the bat. Two days later the U. S. Shipping Board team beat the freshmen 13-6. Ramsey, Smith and Bray all took a turn at pitching but were unable to hold down their opponents.

The big game of the season was of course with the Class of 1921 on Field Day, May 2. The prospects for victory were bright, and the team was confident that with the lessons they had gained from experience they would be able to trim the Sophomores. Again they were disappointed, and came out at the wrong end of a 4-1 score, due to the heavy batting of their adversaries.

## TECHNOLOGY TRACK SEASON IS ENDED

Has Been Creditable Year For  
Kanaly's Charges—Outlook for  
Next Year Seems Very Bright

### WORK IS REVIEWED

Technology's track season is over and except for the occasional appearance of a lone runner, the field will be bare until team practices are resumed in the Fall. Technology has had a very creditable track and field record this year. Although the first meet of the year, the Penn Relay Carnival at Philadelphia on April 26, bore no fruits of victory for the team that went down to the Quaker City championships, the showing made there was worthy of mention. In this meet were gathered the best teams of four that could be formed from the material at the best colleges and universities in the country. The Technology team was composed of Garvin Bawden, T. P. Spitz, J. A. Downey and J. B. Ormon.

On Saturday, May 3rd, Pooch Donovan's Harvard speed-merchants came to Tech Field and walked home with the dual meet by a score of 73 to 44. It was due to the fact that Harvard made use of its superior strength in the broad jump and high jump that the meet was turned in the Harvard direction. For Technology, Bawden captured the quarter and half-mile runs while Wink Rollins and J. W. Poole placed well in the hundred and 220. Parcell and Stone trailed O'Connell of Harvard in the mile in comparatively slow time. Dandrow who was at his best threw the hammer 138 feet, 3 inches for a school record besides winning first place in the event.

A week later the team went to Dartmouth to battle the Green on track and field. But it was not the team that represented the school the week before. Bawden while practicing in the high jump on Thursday was unfortunate enough to twist his ankle so that he was forced to take a three weeks' lay-off. This gave the quarter and half-mile victories to the Green with Downey of Technology the second man in each event. Rollins won the hundred and was second in the 220. Dandrow was unable to make the trip to Hanover

## SUMMER CREW PLANNED

Eight Will Be Formed To Take  
Part In July Regatta

Plans are now under way to enroll first class oarsmen to row in an all Technology eight-oared shell in the Fourth of July Regatta to be held under the auspices of the Inter-scholastic Rowing Association. Men who have had previous crew experience are wanted as the time remaining is too short to endeavor to whip a green crew into shape. It is especially desired that those men who participated in the race last Field Day come out as the material in both the Sophomore and freshman crews was exceptionally good. Besides these men there are others at the Institute who have ability in this line and it will be well worth the while of any man interested to come out as the Association offers individual cups to the winners in the regatta.

Those who would like to win seats in this Technology eight should signify their intentions at once by notifying H. D. Folinsbee '22, either by telephone at his home or by leaving a note to that effect in his mail box in the news room of THE TECH in the basement of Walker Memorial. This is an unusual opportunity for men staying at the Institute and those who will be living here during the summer to get healthful and enjoyable exercise as well as worth while prizes.

Practice will begin on Monday, June 23, the first Monday after examinations, at 3.30 under the care of the veteran coach, "Pat" Manning, at the boat house at the Boston Athletic association near the Cottage Farm bridge.

## ART EDITOR ELECTED

Roger Hayward '20 Is Chosen by  
Competition

On Monday afternoon, an important meeting of the board of Technique 1921 which had been elected up to the time of the meeting was held, with the object in view of choosing the Art Editor, and of considering the policies for the "book." The Art Editor was chosen, and competitions of the various departments were planned and much of the next year's work was scheduled as far as such advance work is possible.

F. B. KITTREDGE '21  
Societiss Editor

The man who was elected Art Editor is Roger Hayward '21, Course IV man. The department of which Hayward is to take charge is without doubt one of the most important in the whole list. It is for this reason that the election has been held off for so long. It is expected that Hayward will get many sketches and drawings this summer, and when work starts next year, the department will be well on its way towards finishing the routine work which must be done in fixing up the departments in the book for the different activities.

The art department consists of the editor and two associates who will be chosen by a competition to run throughout the summer and the fall. Any architect or other person who is interested in this should see either Smithwick or Hay-
