The Physics course, in 2, by lengthening the course and making it more thorough and, less course the will be ten weeks instead of

WHEATHERS '22
APPOINTED RECRUITER
J. D. Whittemore '20, VI, general recruiter of the West Virginia Virginia Technical, has received his appointment as recruiter for the company by Judge Toby

CHAMPION 72 IS PROF. AT LEHIGH
Robert C. Champion '75, of the chemical staff of the Lehigh University, has been appointed associate professor in the science of chemistry.

WILL THE NEW FUND BECOME MORE DORMITORIES

THE dormitories have done much to improve the life in the residence by enabling a considerable number of men to live on campus. The new arrangement, however, makes more room for undergraduate activities, which would otherwise not have been able to take much interest in the school if it were to live away at a considerable distance, in Europe or Cambridge.

The location of the Institute is unfortunate in that there are no places for the students to live where they can have a complete training in the arts and sciences, and live with the students of other colleges.

The problem is how to make the students live in a manner that will give them a complete training in the arts and sciences, and live with the students of other colleges.

The question of the dormitories is one that must be decided.

The present dormitories are nowhere near large enough to care for the vast numbers of students that are going to be admitted to the Tech this year.
