WAR RECORD COMMITTEE HOPES TO SELL COPY OF BOOK TO EVERY UNDERGRADUATE

Will Furnish Blanks With Registration Material
To Gain Complete Information From Student Body

I

ND carly, to obtain complete information for the Technology War Record, a volume published by the Technology War Record Committee of the Alumni Association, blank forms have been placed in each brick containing material of each student. The committee consists of Henry W. Tyler Jr., chairman; Walter E. Snow Jr., A. Margaret Davies Dunham, and Winfield S. Ford, assistant secretary of the committee.

The book is designed to be a permanent record of the work of Technology undergraduates who served in the war in any capacity. It is aimed at collecting all the information that will be of use to the committee and also to any alumni who might be interested in the war records of the Institute.

The book is divided into three parts:

1. The original blank form
2. The completed form
3. The pages of the book

The blank form is designed to be filled out by the student during the war and then submitted to the committee. The completed form is to be kept as a permanent record of the student's service.

The purpose of the book is to provide a complete record of the war service of each student. The committee hopes to sell the book to every undergraduate, and the proceeds will be used to defray the cost of the publication.

The book will be distributed to the student body during the fall semester, and the committee will be on hand to answer any questions and to collect the completed forms.

The committee is also planning to hold a meeting for all interested students to discuss the book and its purposes. The meeting will be held on a date to be announced later.
