### T. C. A. OFFERS ROOMS

Has List of 150 at Present—Will Have More Soon

The situation of Technology is quite critical at this time. The neighboring college and university are already under pressure, and the students have taken many of the rooms that were ordinarily available for them. In addition to this, there are to be from 300 to 500 new freshmen this year. The Technology Chronicle Association, which has been steadily growing, is now very active, and the present list of 150 rooms will soon be exhausted. The students are forced to live in the dormitories, which are overcrowded and uncomfortable. The situation is critical, and the students are urged to apply promptly for rooms.
