COMMUNICATION

To the Editor of THE TECH.

Can anyone give any sound reason for the constant attempts that are being made by students to publish it by its incorporation? Lies will come to light eventually, and the Washington Post is still to receive the money that was promised to it.

There are many students who will find it difficult to endure the demands of the Washington Post when they have a better chance of publishing it by its incorporation.

A. M.

THE TECH

Published semi-monthly throughout the academic year, and weekly during the summer vacation by the students of the MASSACHUSETTS INSTITUTE OF TECHNOLOGY.

 enter a second-class matter at the Post Office at Boston, Mass., under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1872, authorized on July 10, 1891.

GIVE IT A TELi

THere is an increasing tendency on the part of the university's groups and societies to divide the regular classes into groups according to the ability of the members of the class to benefit by the instruction given in them. This is especially true in the upper classes. These groups are of great value in that they provide a better opportunity for the pupils to enliven the classes and make them more enjoyable. They also provide a better opportunity for the pupils to participate in the instruction given in them.

A NEW SONG BOOK

There is a decided need of a new song book; one that will more satisfactorily answer the demand for a truly representative selection of Technology songs. It is the almost unanimous opinion of the undergraduate body that the old song, appropriate as it may have been for these Frequent Tunes, is now too far removed from the spirit of the present day. Much of the old material is of a purely technical nature, while the new material is more general in its character. Such a plan of separation according to ability might be employed as a means of dividing the regular classes into groups according to the ability of the members of the class to benefit by the instruction given in them. This is especially true in the upper classes. These groups are of great value in that they provide a better opportunity for the pupils to enliven the classes and make them more enjoyable. They also provide a better opportunity for the pupils to participate in the instruction given in them.

SUGGESTED ACTIVITIES

Weekend trips are suggested, hiring and firing, and shop practice, and citizenship. The latter part of the plan could come under the jurisdiction of the T. C. A. Should supply the student with the complete list of the subjects. The subject of ethnological instruction in the T. C. A. should supply the student with the complete list of the subjects.

Courses

A. A. Maybach of the Massachusetts Institute of Technology is suggesting a course on "The Various Aspects of Technology and Literature" for the benefit of ex-service men and women. This course is being given at the Massachusetts Institute of Technology and is under the direction of Mr. J. F. Deegan. The courses are being given in cooperation with the American Legion and the American Committee on Technical Education. The courses are open to all ex-service men and women, and are free of charge. The courses are being given in cooperation with the American Legion and the American Committee on Technical Education. The courses are open to all ex-service men and women, and are free of charge.
