AMATEUR WILL SOLVE PROBLEMS

This Prediction Made at Annual Banquet of the Radio Society—
Dinner Attended by Enthusiasts From New England and New York

PROMINENT MEMBERS OF A. R. R. L. SPEAK

That all the great advances in radio work would continue to be inaugurated by amateurs was the statement made at what was probably the greatest amateur gathering ever in New England. The banquet of the M. I. T. Radio Society, in conjunction with the New England Wireless and Television Society, and other clubs affiliated with the American Radio Relay League, took place in the main dining hall of Walker last Thursday evening at 7:30, to which Mr. E. O. Kintzler, toastmaster, introduced the principal speakers.

Raymond A. St. Laurent '21, Chairman, Editor, The Tech Engineering News

E. C. MILLER DIES

Edwin C. Miller '73, former president of the Alumni Association and an associate of the managing editor at the time of his death, was yesterday set on the stage at the Harvard Club, where the body will remain until the funeral on Wednesday.

He was formerly president of the Harvard Club, and was active in politics and civic affairs, as well as in the University, for which he received the education at the English High School and the Harvard College, in the class of 1790. From here he went to the University of Paris, where he studied law and became, among other things, a lawyer.

At one time Mr. Miller was class secretary, and was the first treasurer of the Technology Club. In 1856 he went to Washington City, where he was a member of the American Association for the advancement of science.

His influence in the Massachusetts Tech is still keenly felt in the gift of the state of $30,000 annually.

COLEMAN DU PONT '91

Coleman Du Pont '91 is chairman of the Inter-Mural Council, which is making a campaign "to make alumni better understood." The aim is to foster the interests of alumni in general and to promote better relations along the line. The immediate cause of the campaign, it is claimed, is the opposition, which is making many harm-mina undeniably progress to leave the country.

WATT '96 MEDAL

Mr. and Mrs. George P. Duff '77 of Concord, Mass., have been the proud owners of the Watt medal since its presentation in 1901. The medal is a gold medallion with an enameled portrait of James Watt, the inventor of the steam engine, and was presented to Mr. Duff by the American Institute of Mining Engineers in recognition of his services to the cause of science.

IGNORANCE OR ENNUI?

W e are interested to know the nature of the epidemic which has found such ready victims as the treasures of the avant-garde. In this connection, and with reference to the recent articles of the magazines of the week, we find that Mr. Thalheimer has been engaged as a teacher in West Roxbury, and for the past twenty years he has been a member of the Massachusetts State Board of Education.

A. THOMAS '23, Assistant, Advertising

The appearance of the main lobby has been noticeably improved since the tables have been removed to be placed elsewhere. This is welcome to a downtown Ford. We might further suggest that the corridors would be kept cleaner if all receptacles for waste paper were placed throughout the building as a natural place.
