COMMUNICATION

To the Editor of THE TECH:

I cover this week considerable the communication appearing in the last issue of THE TECH. To my the four institute students, want to reach the two newspaper articles, and agree in that the best source of for the situation. In my opinion the Technology does not have the best interest, but simply statements of facts. I have over the Technology swimming meet canceled. I was rather that the fact that the relay race, after failed to cover the entire distance on February 5, when Professor Lipka was the opinion of the entire executive committee. The Swimming article did not do I have the opinion that TheTECH in referring to this fact simply assume that the executive committee is composed of the Asst. Man. Chairman was a superior combination of a student swimming and a faculty swimming. Property others will be in the future form a host lodgers with dormitory life

THE T. C. A. CALLS FOR VOLUNTEERS

W. C. A. is a call for service? Students need to show the world that Technology is a Austria. The places to be filled are many and so varied that an interest for each person to find a place in which he can help. In my opinion, the men will be getting a training, the lack of which is one of Technology's greatest shortcomings. And this is more important now than it has been in the past.

If you are interested, please see any member of the Dormitory Association or write to W. C. A. at 360.
