Baldwin '96 Cited

Secretary Baker Awards Medal To Designing Engineer

Henry E. Baldwin, '96, a member of the George Peabody Foundation board of directors, has been named by Dr. John E. Mason, president of the General Electric Co., as the recipient of the University's annual Gold Medal for distinguished service in connection with the building

of the Walker Memorial dining hall. Prof. Baldwin was cited for his services as project engineer for the construction of the hall.

Strong Combination to Enter Intercolligates

Institute Matmen Expected to Make Good Showing Against Eastern Teams in Intercolligates Meet at Springfield March 13

Grapples are Underplayed This Year

Technology is one of the big favorites, and promises to make an all-out effort to win the Intercolligates wrestling meet. The team of 11 men is composed of strong individuals and promises to do well in the competition.

Tech Grapples To Opponent

Head of World's Largest Ship Building Tells Undergraduates to "ALWAYS HAVE IT?"

"If you think you can make good before Tech men, you can make good before anyone in the world," said C. F. W. Woods, '27, vice-president of the American International Shipbuilding Corporation. Mr. Woods made this plea to the undergraduates at the annual Hog Island smoker.

Formation of the Hog Island shipyards has been made possible, Mr. Woods stated, by the fact that 1,000 men were kept busy in seven weeks, then 10,000 men, and finally 20,000 men were busy in January.

YALE ENTRIES CHANGED

TRIP OF MUSICAL CLUBS CURTAILED

One Only Concert Will be Given This Year Due to Lack of Number of Alumni in Cities Formerly Visited

TO BE IN MONTCLAIR

New Jersey, under the leadership of Dr. W. H. Finney, has decided to stop the running of the Musical Clubs because of the difficult position the장을 and the recruiting-waiting-joining situation. Awareness has been increased through the idea that there may be no musical events at all in the next season.

Owing to the prevalence of influenza and the lack of support of the Alumni in other cities, due to the recent Endowment Fund drive, the management of the Musical Clubs has decided it is impossible to make an extensive trip this year.

Mr. Mervyn has taken charge of all the details of the concert, including the sale of tickets and the promotion of the project. The sale of the tickets will be done by the Alumni, members of the classes of the past five years, who have been chosen for the job.

LANDLADY GOVERNMENT

WILL NOT ALLOW APARTMENTS

"I'll we get DORMS?"

"If we get dorms, we'll be in the black," says Mr. Mervyn, the former president of the Senior Class. "If we don't, we'll have to stay in dormitories." Mr. Mervyn is expected to be in the black next year.

Dorming over Board Supports Project

Professor Henry L. Bullen will talk on the subject of the dormitories at the meeting of the Institute Committee on Thursday, March 2.

The report of the group on investigating the housing situation for the undergraduates shows that, of the three thousand undergraduates at the Institute, over one thousand are married for the time being when they also desire the good of married life in dormitories. The report for a common home for the students on the Institute grounds is receiving the wholehearted support of every Alumnus and the second step is the plans for the future.

WALKER MEMORIAL FILLED TO CAPACITY

Head of World's Largest Ship Building Tells Undergraduates to "ALWAYS HAVE IT?"

"If you think you can make good before Tech men, you can make good before anyone in the world," said C. F. W. Woods, '27, vice-president of the American International Shipbuilding Corporation. Mr. Woods made this plea to the undergraduates at the annual Hog Island smoker.

Formation of the Hog Island shipyards has been made possible, Mr. Woods stated, by the fact that 1,000 men were kept busy in seven weeks, then 10,000 men, and finally 20,000 men were busy in January.
