

PROFESSOR SEDGWICK SAILS FOR ENGLAND

Will Represent Technology at
Royal Institute Conference—
Professor Prescott Will Take
Over Work of Department

IS FIRST EXCHANGE PROFESSOR

Professor Sedgwick, head of the department of Biology and Public Health left Boston last Wednesday to embark on the Carmania for England. While there he will be associated with the Universities of Leeds and Cambridge as the first exchange professor from the Institute, although, due to the effects of the war in England, no return professor will come here until next year.

During his residence in Europe, Professor Sedgwick will also attend the conference at the Royal Institute of Public Health which will be held in Brussels. He will go to this congress as a representative of Technology, Harvard, Massachusetts Department of Health, the American Public Health Association and the international health board of the Rockefeller Foundation. He has just

MAKE FINAL ARRANGEMENTS FOR RECEPTION IN WALKER

Partners of Junior Class Officers
Will Be Hostesses

The arrangements for the reception to be held in Walker Memorial on Saturday are complete. The tables will be moved out of the main hall and Bert Lowe's orchestra will play there. Tea will be served in one of the reading rooms by the partners of the Junior Class officers and of the Junior Week Committee.

The reception will start at 4:00 and will last until 7:00 o'clock. A limited number of tickets still remain and may be obtained by applying to A. D. Harvey '21.

GENERAL SWIFT WILL LECTURE

Brigadier General Eben Swift, U. S. A. formerly in command of the 82nd division will give two lectures to the Sophomore sections in military science on the evenings of April 20 and 21 in the Main Hall of Walker Memorial at 7:30. The subject of his lectures will be "Features of the American Campaign in the World War." These lectures will take the place of the regular lectures given in 30-101 for the week of April 19.

Captain F. M. Green, C. A. C., has resumed his lectures to Sophomore sections, his subject being Military Law. The series of lectures on Engineering subjects given by Major H. F. Clark terminated with "Flash and Sound Ranging."

GREET GENERAL WOOD TOMORROW

SHOW SPENDS SUNDAY IN FINAL REHEARSAL

All Day Session Ends in First
Complete Performance of
"Pasty"—Amusing Incidents
Relieve Tedium of Tired Per-
formers

CAMEL SCORES HEAVILY

All the units of Tech Show were united at the dress rehearsal held on Sunday at the Arlington theater. The rehearsal of individual scenes started at 9 o'clock in the morning and beginning at 8 o'clock the entire production was run through again without interruption. The results attained were highly satisfactory to everyone concerned and the management feels that this year's production will eclipse any Tech Show hitherto staged.

While the stage was being set, the men put on their costumes and after the co-eds had added the final touches, went to have the make-up applied. Serious students became vivacious chorus maidens and sedate Seniors shivered in the scanty attire of Egyptian courtiers. Dusky sons of the desert borrowed cigarettes from the emperor of the Roman world, while the leader of the Bolsheviks seemed on the best of terms with Cairo's chief of police.

One set is used for the two acts, with a few changes for the ballet. It represents Cleopatra's palace, with massive stone walls covered with hieroglyphics. Costumes, lighting effects, and scenery blend with all the vivid harmony of a Maxfield Parrish painting.

High Spirits Prevail

The day's work began with a rehearsal of the first scene by cast and chorus. Numerous minor corrections

(Continued on page 4)

AERO LECTURES BEGIN

Use of Wind Tunnel Discussed
Before Society

Over 40 men attended the first aeronautical lecture held last Friday in room 10-275 at 4 o'clock. The discussion was on the subject of wind tunnels, and was given by G. M. Denkinger '13 through the Aeronautical Engineering Society.

All the details concerning wind tunnels and the testing of airplane models in them was explained. Following a description of the open and closed circuit types of tunnels and of the static and dynamical weighing mechanism, the mechanical and physical corrections of the data obtained in the tests were discussed. The latter of these consists of the necessary corrections for temperature, density, pressure and precision of measurements.

Plan Trip To Aircraft Plant

The next lecture of the series will be on the calculation of the performance of full size airplanes, based on the data taken in the wind tunnel tests of models. This will be given on April 23 in room 10-275 at 4 o'clock by Mr. Denkinger.

During the week following Junior Week the Aero Engineering Society will make a trip to the plant of the Gillespie Aircraft Corporation in Cambridge. Among the machines in construction there is a plane which was designed by A. L. Morse '21, who is the president of the Aero Society.

SUSPEND EXERCISES

By vote of the Faculty, exercises of the Institute will be suspended on Friday and Saturday, April 16th and 17th. Exercises will also be suspended on Patriot's Day, April 19th.
A. L. Merrill,
Secretary

Institute Welcomes Presidential Candidate in Walker—Speak on Non-political Issue —1800 Sign to Come

SERVE BUFFET LUNCH AFTER SPEECH

General Leonard Wood will address the faculty and undergraduates in the main hall of the Walker tomorrow at 12 o'clock. He will speak on a non-political topic. Because of the interference with the regular dining service, a buffet lunch will be served immediately after the finish of the speech.

SENIORS VOTE AGAIN

Make New Choice of Class Day
Committee Tomorrow

As a result of the rejection of the Senior Class Day election last week by the Institute Committee, a new election will be held tomorrow during the whole day in the refrigeration laboratory, room 3-115. New ballots have been printed which contain the accurate and complete list of the members of the class of 1920.

Over 72 per cent of the Seniors cast in their ballots at the voting last Friday. The officers of the Class express the hope that an even greater number of men will take an interest in the new choice of the Committee, but they also issue the warning that any attempts to manipulate the election or to vote for any combines will not be tolerated.

A student committee composed of the following men will act as a reception committee: R. F. Officer '21, chairman, N. G. Abbott '20, J. C. Nash '20, R. A. St. Laurent '21 and W. Dean '21. Dr. Francis Williams a personal friend of General Wood will introduce him to the governing committee of the Institute composed of Professors Talbot, Miller and Wilson. After this, Norris G. Abbot '20, will present the General.

Additional tickets have been printed, due to the fact that the place of speaking has been changed to larger quarters. These will be ready for distribution all day today. The management urgently asks all men who expect to attend the talk to be on time, as tardy entrance detracts from the attention of all. Admission will be by ticket only.

Has Notable Career

A number of prominent persons have been invited to attend, among them; Ex-Lt. Governor Frothingham,

T. A. C. CONTINUES DRIVE

New Organization Has Enrolled 800 Members Since
Meeting Thursday—Will Publish Booklet in Summer

The drive of the Technology Athletic Club for new members has already netted 800 undergraduates. The officers of the club, however, think that this is far from the actual number since less than half the men conducting the drive have been heard from to date. The club expects and is making preparations for 1500 members by the end of the week. Membership cards may be obtained in at least 50 sections and will be on sale in the main lobby every day.

Among the numerous plans of the club, one has been already started. This plan calls for the publication of a book during the summer months to be distributed among club members in the fall. The book will contain the constitution of the club and all information concerning its organization. All results of athletic meets of the previous year will be contained within its folds as well as the schedules of teams for the coming year.

The club is also working on a plan to install a new system of prices for the use of the tennis courts at Walker for club members. Under the present system the payment of ten cents an hour is made to cover the cost of the man in charge of the courts. If the idea of the club works out, it will pay for the upkeep of the courts so that the price for club members will be reduced or possibly be free to all members.

P. S. WILDER '23 IS HEAD OF T. C. A. BOOK EXCHANGE

At a recent T. C. A. executive meeting, the resignation of E. R. Clark '21, head of the book exchange was accepted. Although Clark has resigned, he will continue in an advisory capacity for the remainder of the school year. P. S. Wilder '23 has been appointed to succeed him as director of the bureau.

Wilder states that letters will be sent to the various professors to ascertain what books will be needed for the first term of next year. In this way, the T. C. A. expects to obtain a list so that all who have books which they wish to dispose of may know what texts are salable. This plan was followed last term with success.

WILL ATTEMPT TO ORGANIZE HOOVER CLUB AT INSTITUTE

At the request of many enthusiastic Hoover supporters at the Institute, plans have been made for the formation of a Technology Hoover Club. This organization is to be one of a chain of clubs now existing in different colleges, its function being not to act primarily as an integral part of a complicated political machine, but rather as a means of spontaneously expressing the sentiment of the men at the Institute, both of the Faculty and student body, who favor the election of Mr. Hoover as President.

Members of Faculty Interested
Among the faculty members who are instrumental in promoting the organization, are the following: Dean Burton, Professors Bugbee, Hayward, Lindgren, Warren, Lewis, Norris, Blanchard, Phelan, R. E. Wilson, Mac Adams, Prescott, Dewey, Doten and Tyler, and Messrs. Barry and Jones. These men and some of the undergraduates are making plans for the organization activities among the student body.

Dr. L. W. Parsons is acting as temporary chairman of the club.

A committee composed of several of the above mentioned men is now considering final organization plans which will be presented shortly to the Hoover supporters at the Institute.

MUSICIANS ASKED TO REPORT

Technique 1921 requests any man who can make a noise on a wind instrument to report at the Technique office at 4 o'clock Thursday.

CALENDAR

Tuesday, April 13
6:30—Faculty Club dinner, north hall, Walker.
7:30—Get-together Club, grill room, Walker.
Wednesday, April 14
12:00—General Wood mass meeting, main hall, Walker.
7:30—Combined professional societies, north hall, Walker.
Thursday, April 15
4:30—Technique Rush, Great Court.
8:00—Spring Concert, Hotel Somerset.

Traditional Technique Rush Will Commence Junior Week Activities

Hut Erected in Great Court for
Thursday Afternoon Event—
Exchange Signups for Copies
in Lobby After Contest

USUAL RULES GOVERN MELEE

Junior Week will open Thursday afternoon with Technique Rush, which will take place in the Great Court promptly at 4:30 o'clock. After the rush, all who wish may redeem their signups for this year's edition in the lobby.

The battle-scarred hut of former years will stand again in the center of the court in its coat of gaudy colors. Shortly before the appointed hour, the 1921 Technique Board, headed by its band, will make its appearance and will go within the square in which the hut is situated. From within the square, members of the board will announce to all contestants the rules of the contest. The most important of these are that no man is eligible to enter the contest

(Continued on page 4)

PROGRESS MADE IN CHOOSING 1922 BOARD

By the process of elimination elections, the Technique 1922 Board is gradually nearing completion. Meetings on Friday and yesterday resulted in the addition of four more men. At the meeting yesterday W. T. Ferguson ended one competition by withdrawing from his nomination for statistics editor. This resulted in the unanimous election of R. E. Spaulding. Another unanimous choice was A. E. Meling for Portfolio editor. The advice of the Technique 1921 Board was followed in choosing T. N. Berlage treasurer and F. J. Burt associate business manager.

Still One Deadlock

The Monday afternoon meeting ended with still one deadlock to be broken. W. B. Purinton and A. L. Johnson remain tied for faculty editor.

Competition for grinds editor was narrowed down to four men, George McCue, A. L. Morrow, W. T. Ferguson and J. C. Patty remain in the race for this position.

PUBLISH PROGRAMS

Junior Week Programs may be obtained in the main lobby on Thursday before the rush. Men attending the Prom are asked by the committee to obtain a copy as the seating arrangements are given in it.

PLANS COMPLETE FOR FIRST DOUBLE PROM

Prompt Arrival Urged by Committee—Request Adherence to
Seating Arrangements—Junior
Week Programs Published
Thursday

DANCE PROGRAMS IDENTICAL

With all the final arrangements for the 1921 Junior Prom completed the committee feels safe in predicting that the affair will not only be the biggest but also one of the best that Technology has ever seen. The committee has had many problems to contend with,—notably, the overwhelming demand for admission and the two o'clock law, but all of these have been successfully met.

The overcrowding was eliminated by dividing the Prom into two sections and the two o'clock law ceased to be a factor when the committee succeeded in obtaining a permit for the Prom to last until four in the morning.

Promptness Urged

The committee urges everyone attending to be at their respective sections as near as possible to 9 o'clock in order that the dancing may commence on time. If this is not done it will not be possible to get in the scheduled number of dances. The committee also requests that each man adhere to the seating arrangement, which will be published in the program of the week. This program will be given out in the main lobby just before the Technique Rush on Thursday.

The programs for both Proms are identical, but supper will be served at 1 o'clock at the Copley Plaza both

(Continued on page 4)

CONSIDER SENDING WEST POINTERS TO INSTITUTE

Colonels G. A. Younberg, L. K. Watkins and V. L. Peterson of the Corps of Engineers, U. S. A., arrived at the Institute last Thursday to confer with the faculty concerning courses which West Point graduating officers may take at the Institute, to amplify the training given at the Military Academy. It is hoped that the visit is successful, as the securing of a detail of Engineer officers at the Institute would further increase the prestige which Technology already has with army authorities.
