

ATHLETES OFF FOR BIG PENN RELAY CARNIVAL

(Continued from page 1)

him too hard in the trials and allowed him to drop out at 600 yards when he was well ahead of the others.

Bawden's Illness Weakens

Stone was first man in at the trial runs. The trials were only 780 yard races. Gurney was close behind Stone and Chittick a stride behind Gurney. Hennessy was fifth and Gill sixth. The positions on the team will probably be: Bardes at anchor, Stone lead-off man, Chittick, second and Gurney third. The team is faster than the combination which won the event two years ago but the other colleges have also developed faster quartets. Frank Kanaly said before leaving that the chances for a place this year are pretty slim. Mich Bawden's illness has weakened the team considerably and if he were available, the team would be as good as any.

Among the best of the opposing teams are Penn, Oxford-Cambridge, Iowa State, Princeton, Dartmouth and Chicago.

Montague Star of Carnival

The anchor man on the English team is Montague, who will also run in a special invitation three-mile run. The Penn track management has invited a group of stars from all over America to stack up against the British wonder.

The Quaker City college quartet is made up of Shields, Eby, Brown and Gustavson, who are reputed to be well-nigh invincible. The Quakers have won the event more times than all other universities combined. Princeton, Chicago and Iowa State bear watching tomorrow. It seems that the presence of the team from England has attracted more colleges than usual.

Bardes at Anchor in Medley

The sprint medley relay team is made up of Ted Bossert, Jim Downey, Charlie Chittick and Ollie Bardes. Bossert and Downey will run the 220, Chittick the quarter and Bardes the half. Trials were held only for the 220 places. Bossert was easily the best with Downey second and Hayes third. Bossert will lead off with Downey second, Chittick third and Bardes at anchor. The teams entered in this event are not as big as those slated to jog the two-mile with the exception of Harvard, Brown and Dartmouth. Harvard's quartet is made up of O'Connell, Wharton, Goodwin and Gourdin.

Billy MacMahon has been entered in the special run against Montague and he will probably be up at the front. MacMahon has been showing good form all year and has been training hard this last week in preparation for the big race tomorrow. Eastern college stars have also signed up and it seems that Montague will be hard pressed to get home first.

Dandrow's Chances Good

George Dandrow will accompany the runners to take part in the 55-lb. weight throw. Kanaly said that he had a good chance to cop first laurels in the event. He recently threw the iron 29 ft 2 inches which is as good as has been done in the last five years. He will be in the shot put. Jack Kellar is also scheduled to put the shot.

Kellar is making the trip to enter the discus throw. He won the event at the New Englands last year and has not been defeated this season.

Bossert and Downey will start in the 100-yard dash.

THREE CREWS CLASH ON RIVER TOMORROW

Princeton, Penn. and Harvard Crews Will Race in Basin—First Regatta of the year for Tiger Oarsmen

STAGE THREE RACES

Princeton, Pennsylvania and Harvard varsity crews will stage a triangular meet tomorrow afternoon on the Charles River course. The visiting crews arrived in Cambridge yesterday, the Quakers bringing only their varsity eight and Princeton arriving with first and second varsity and freshman eights. Besides the principal event there will be races between second varsity and freshman crews of Princeton and the corresponding Harvard oarsmen.

The course will extend from the Cottage Farm Bridge to the Union Boat House. Provided the weather is satisfactory, the varsity race will start at 5 o'clock, the other events following.

This is the first regatta of the year for the Tiger oarsmen. Last year Harvard met Princeton at Annapolis carrying away the honors of this event but losing to the Annapolis crew.

FACTS NOT STATED

The story in the last issue of THE TECH, emanating from Philadelphia where the Institute boxers met the University of Pennsylvania fistic artists last Saturday, was discrepant in two particulars. R. D. Rhodes '21, was the man who surprised even the most enthusiastic admirers of Tommy O'Malley, the Penn 135 pound wonder, by his speedy exhibition, not Fritz Paul, as stated.

In the 153 pound class it was Tommy Proctor, instead of Bradley, who fought Bessel. Manager John Crosby informs us that the score of the meet, 5-1 in Penn's favor, does not tell the whole story of the evening's boxing according to Crosby, several hair-line decisions were made, all of them in Penn's favor.

PLAY BALL TOMORROW

Team Faces Wentworth Varsity Away From Home

Coach Bill Sweeney has decided to combine the freshman and Soph baseball teams for their tussles with all varsity teams hereafter. This combination will not be known as the Tech varsity, but just the M. I. T. baseball team, and will so appear on the schedule cards, which are now ready for distribution.

With this in mind, the combination of ball tossers will face the strong Wentworth Institute aggregation on the latter's grounds at Huntington Avenue tomorrow afternoon at 2:30 o'clock. All undergraduates may obtain free admission to the game according to Manager Walsh.

As this is the first game of the season for the new corporation of n-chasers, he expects a large attendance. To arrive on the grounds, take a Dudley Street car, change to any car going south at Huntington Avenue and get off at Wentworth Institute.

BASKETBALL PROVISIONALLY RECOGNIZED AS MINOR SPORT

At a meeting of the M. I. T. A. A. last Tuesday, basketball was provisionally recognized as a minor sport at the Institute.

Basketball was popular this year at Technology, leagues among the fraternities, dorms and classes keeping the floor busy nightly during the week. There is no doubt that the cage game will be big next year and from the caliber of the games played while it was in its infancy this season, a good team could be turned out.

It is probable that the game will be made a varsity sport in 1921 if a good season is forthcoming next winter. The sport is on the varsity list at many colleges and brings the reward of the varsity letter as well as football, baseball and track.

SHOOT AT WAKEFIELD RANGE

Thirty members of the Rifle Club are going tomorrow afternoon to Wakefield to the outdoor range. This is the first trip of the Rifle Club this year to the range at Wakefield where Springfield rifles and ammunition are used instead of the small caliber rifles that are used in Walker.

DORMS TENNIS TOURNAMENTS SCHEDULED TO START SOON

A tennis tournament has been started in the dormitories. The management has requested that men choose partners within a day or two so that they may be prepared to turn in teams when called for. Prizes will be awarded.

There are to be four tournaments in all. A singles, room doubles, doubles and consolation singles tournaments will be run. The dorms are also holding a handicap pool tournament. The elimination rounds will be played before the end of the week and the final round will come on May 5. The following are entered: Butler, 100; Bond, 100; Markson, 90 Whelan, 90; Radcliffe, 90; McLean, 80.

TENNIS GETS GOING

Four Additional Tennis Courts Under Construction

The spring tennis tournament will start next Wednesday afternoon. All members of the Institute are eligible to enter. A box with blank cards will be placed in the main lobby on Monday. Each entry will fill out one of these cards. The tournament is for singles only and the entrance fee is seventy-five cents per entrant. The winner of this contest will receive a silver loving cup, the funds for which were donated by the tennis team.

Four new tennis courts are being constructed in the rear of Walker Memorial. These courts will be similar to those already in use except that there will be five feet more space between the base line and the back stop, the world's record for the distance to ter part of the summer.

FROSH RACQUET WIELDERS VICTORS IN FIRST MATCH

Beats English High School by Score of 4 to 1

The freshman tennis team started its season with a victory over English High School last Monday at Jarvis Field. The score was four to one. This victory was accomplished in spite of the fact that the Technology freshmen were greatly handicapped by lack of practice, due to bad weather conditions. During the matches several excellent men who will make good varsity material next year, were discovered.

H. L. Haden, Tech beat J. C. Backmann, English High 2-6, 6-4, 6-4.
M. B. Beattie, Tech beat A. Moskow, English High 10-8, 6-2.
T. Slack, English High beat J. E. Burchar, Tech 6-1, 6-0.
W. B. Murdoch, Tech beat M. Selig, English High 8-10, 7-5, 6-4.
L. L. Tremaine and W. R. Taylor, Tech beat T. Slack and H. Preble, English High 6-3, 9-7.

The next match will come tomorrow against Brookline High School, at Jarvis Field. The management requests members of the squad to report as soon after lunch as possible. Notice of the matches following will be posted on the bulletin boards soon.

T. A. C. HAS TICKETS.

(Continued from page 1)

The yearlings have improved considerably and should have no trouble in trimming the Worcesterites. Webster, Bruner, Heap, Plaisted, West, Bolster, Greenough, Hendrie and Holden are expected to do well for the 1923 runners.

Varsity men who are not in the Penn relays, with the exception of Mich Bawden, who is still out of the game as a result of a case of mumps, will participate in what Frank Kanaly calls a short-limit handicap meet tomorrow. The scratch men are expected to win all events but the others will be given enough handicaps to make the result at the tape mighty close. Spitz, Hayes and Hamburger will probably be scratch men.

MIKE HOAR RUNS N. E. A. U. HURDLE CHAMPION MAY 7

Mike Hoar, the veteran ground-keeper for Frank Kanaly's runners has again entered the arena of the

cinder path and will attempt to beat H. H. Hile, New England Amateur Athletic Union champion, in a handicap hurdle and sprint race. It is rumored that Mike never runs unless there is a ten-dollar wager on the contest.

The day of the gruelling encounter will be Friday, May 7. Mike will run 40 yards on a free track but Hile will have to cover 45 yards and clear three high hurdles to boot. Mike has figured that Hile will have to break the world's record for the distance to beat him!

FRAT MEN DANCE

Inter-Fraternity Dance Will Come May 7

The inter-fraternity dance will take place at the Hotel Somerset on the evening of Friday, May 7. Rueisman's orchestra has been secured to play for the occasion and further details will be announced at a later date.

The dance will be a formal affair, beginning at 8:30 o'clock and lasting until 2 o'clock. Those attending will be limited to members of the Inter-Fraternity Conference and no others will be admitted. The price will be \$5.00 for each couple.

Rueisman's orchestra, which played at the Junior Prom, has been engaged to play for the dance. The names of the patronesses and other particulars will be announced in a later issue of THE TECH.

TWO PAPERS READ AT HARVARD-TECHNOLOGY CHEM CLUB

The Harvard-Technology Chemical Club held a meeting last Tuesday evening at the American Academy of Arts and Science. Two lectures were delivered on technical subjects by men who had made recent investigations on the subject: The first paper was prepared by Professor G. F. Forbes of Harvard on "Reactions Between Thiosulphates and Arsenic Compounds." After this paper was read and discussed, Dr. T. L. Davis of the Institute Faculty spoke on "New Hypothesis on the Structure of Benzene."

MINERS MEET NEXT WEEK

Tod Woodworth, well known engineer, will speak to the Mining Engineering Society some time next week. His subject is not yet known, but it will have to do with mining engineering. Mr. Woodworth was at one time with the Anaconda Company and has been at work in Canada and Mexico. At present he is in charge of a silver mine at Newburyport, Mass.

The meeting was to have taken place last Tuesday but was postponed.

HARRISONS, INC.
35th and Grays Ferry Rd.
PHILADELPHIA, PA.

The coalition of Du Pont and Harrison interests enables us to give maximum satisfaction to practically every manufacturer whose requirements demand the best in chemicals.

For the manufacture of the products mentioned we operate plants at Parlin, Newark, Deepwater Point and Paulsboro, N. J., and at Philadelphia, Pa. These plants are designed especially to care for the particular needs of the various industries in which our products are used, and they represent the most modern development in construction.

Expert supervision, complete laboratory control over factory operations, perfection in technical skill, the best in raw material, and unequalled facilities are the dominating factors in the manufacture of high grade chemicals and insure the Uniform Quality that distinguishes all Du Pont and Harrison products.

The technical skill and facilities of our laboratories are at the disposal of our customers, present and prospective in working out any problems connected with the use of our products.
