Led by the 2nd Coats, the Techmen are preparing to march in the Techmen on April 26th. The Rev. James C. Stagg, in room 2-390. According to the Techmen, the Techmen will be held, and will be self-supporting.

HOG ISLAND MEN SPEAK

Two subjects, both of importance to the men who aspire to high positions in the industrial world, were covered... The first subject was discussed by Mr. Ralston, who gave a very clear picture of the importance of planning and scheduling. His topic was "The Importance of Planning in the Industrial World," which he covered in three main points: the necessity of planning, the importance of scheduling, and the methods of implementing plans. The second subject was discussed by Mr. Johnson, who gave a very clear picture of the importance of business ethics and the role of the industrial manager. His topic was "Business Ethics and the Industrial Manager," which he covered in three main points: the importance of honesty, the importance of integrity, and the methods of implementing ethical behavior.

GRADUATE STUDENT WINTERS ON GREATEST AMERICAN DAM

"America's Greatest Dam," written by William B. West, a graduate student of the Institute, has just been given by the author to the nation. The book outlines the financial organization of the dam, the importance of planning and scheduling, and the methods of implementing plans. The book is available for $5.00 to the public.

PROSPECTORS SCARCE

Prospective Mining Engineers

PRESERVE FOR SUCCESS

At the last meeting of the year, the Mining Engineering Department voted unanimously to continue its annual meeting in one of the larger auditoriums in the city. The meeting was attended by about 300 students, and was presided over by Dr. H. W. White, who serves as the president of the department. Dr. White said that the mining industry has been going through a period of rapid growth, and that the demand for mining engineers is increasing. He urged all prospective mining engineers to attend the annual meeting, where they will be able to meet with professionals in the field and learn about the latest developments in mining technology.

The first subject was discussed by Mr. Ralston, who gave a very clear picture of the importance of planning and scheduling. His topic was "The Importance of Planning in the Industrial World," which he covered in three main points: the necessity of planning, the importance of scheduling, and the methods of implementing plans. The second subject was discussed by Mr. Johnson, who gave a very clear picture of the importance of business ethics and the role of the industrial manager. His topic was "Business Ethics and the Industrial Manager," which he covered in three main points: the importance of honesty, the importance of integrity, and the methods of implementing ethical behavior.

IN EVENING PARADE

Two topics were covered in the Techmen's evening parade: "The Importance of Planning in the Industrial World" and "Business Ethics and the Industrial Manager." These topics were covered in three main points each: the necessity of planning, the importance of scheduling, and the methods of implementing plans. The parade was attended by about 300 students, and was presided over by Dr. H. W. White, who serves as the president of the department. Dr. White said that the mining industry has been going through a period of rapid growth, and that the demand for mining engineers is increasing. He urged all prospective mining engineers to attend the annual meeting, where they will be able to meet with professionals in the field and learn about the latest developments in mining technology.

EXPERIENCE OF TRIP FROM BOSTON TO VALENCIA

R. C. Johnson, president of the Technique, entertained the students and their guests at the annual和技术 conference in Valencia... He emphasized the importance of planning and scheduling, and the methods of implementing plans. The conference was attended by about 300 students, and was presided over by Dr. H. W. White, who serves as the president of the department. Dr. White said that the mining industry has been going through a period of rapid growth, and that the demand for mining engineers is increasing. He urged all prospective mining engineers to attend the annual meeting, where they will be able to meet with professionals in the field and learn about the latest developments in mining technology.
