Cooperation and Research, will speak to the discussion of "Technology Plan", Mr. Murray L. Emerson, Jr., will explain the organization of the Institute, the development of the work, and the future of the Institute. Registration and next will come short talks by members of the undergraded late activities.

Game About The Program. The situation of the program within the limits of the given time will be much about the floating position back of results.

An all-day trip to Plymouth has been planned for Wednesday. Two boats have been chartered for the occasion, and in the opinion of those who have made the trip the day before the nature of the entire occasion will so change the day before four to be one of the policies of its entire occasion, the day from the Class of 47, with 24 delegates. One man will be present from the Class of 98, the first class to be graduated from the Institute, will be present at the Board.

MONSTER TECHNOLOGY

A considerable portion consists of successful graduates and those in elec-
tax courses taking, respectively, quantitative and qualitative analy-

s.
