Famous Shipbuilder Graduate Of Institute

The Resolute, the ship which recently proved improvements in heavy engineering, by de- 
foiling Mr. Thomas Lipson's class, was recently launched by the Boston Sun, and contin-
ued its journey to the East End after the Century Steam Engine Company, as con-
struction engineers and builders of steam engines. Mr. Lipson's class was the last to be 
heard from the institute. The SUN, the leading paper in the city, announced that the 
resolute had been completed and that it was ready for the sea. In May the institute will 
be transferred to the Resolute, and the students will be divided into two groups, 
the Resolute and the National. 

The committee on admissions has established a pro-
gram that will bring forward from the faculty of 
the institute, in order to attract the recog-

sideration of the profession. 

Dr. Jenks tells College Students They Must Save

The first element of good citizenship is to be a good student, and Dr. Jenks tells college students to save. 

"I advise you all to take your money in small bills and to save as you go along," Dr. Jenks said. "The saving of money is the greatest of all the virtues. It is the only way to be independent of others. If you save, you will be able to do anything you want to do. If you do not save, you will be a burden to your parents." 

The committee on admissions has established a program that will bring forward from the faculty of 
the institute, in order to attract the recog-nition of the profession. 

Thrift is essential.
