ASSISTS CATHOLIC STUDENTS

The Technology Catholic Club is making extensive plans for the coming year. Social functions will be held from time to time and it is also planned to bring several nationally known men here for addresses. The purpose of the club is to promote good fellowship among the members and provide for their social and religious welfare. Efforts are now being made to secure the membership of every Catholic student in the Institute. An especial invitation is made to foreign students as the club is in no way restrictive of nationality. During registration, a table has been provided near the main lobby where all students are urged by those in charge to fill out membership applications. Rooming accommodations and general information will be cheerfully given for the convenience of all incoming students regardless of creed.

ROOMS
FOR TECH STUDENTS

Steam heat, electric lights, continuous hot water, $7.00 weekly. Apply 633 Beacon Street, Center Charles Gate West, Back Bay or phone Back Bay 6392-W.

Modern Motive Might

MOUNTAINS, miles and minutes give way before electricity, the magic motive power. Properly applied, it drives giant locomotives across the continental divide, tows ocean liners through the Panama Canal, or propels huge ships. Through good light, safe signals, and illuminated highways, it is making travel better and safer and also is increasing the usefulness of transportation methods on land, sea or in the air.

In short, electricity is revolutionizing transportation, making it quicker, safer, more economical and reliable in all sorts of weather.

And back of this development in electric transportation, in generating and transmitting apparatus as well as motive mechanisms, are the co-ordinated scientific, engineering and manufacturing resources of the General Electric Company, working to the end that electricity may better serve mankind.

SAVE THE PIECES

Be they of marble, ivory, pearl, metal, china, wood, leather, pyralin or glass, Du Pont Household Cement will make them whole again.

Du Pont Household Cement is a pyroxylin cement made of pure cotton (no animal refuse). Water-proof, transparent, does not become rancid or harden in the tube.
