J. F. Fitzgerald of Boston Speaks to Catholic Club
At the regular monthly meeting of the Technology Catholic Club, held in the Faculty Dining Room of Massachusetts Institute of Technology, Ex-Maror John F. Fitzgerald of Boston was the principal speaker. He spoke of the possibilities of the country as regards submission of water power in place of coal, and said that it is for the interests of industries like Technology to solve the power problem. Following his speech Mr. Fitzgerald sang a world famous song, "Sweet Adeline." The Reverend MacNamara, spiritual director of the club, made a short address.

President Gibson of the Pasture Club of Tufts was present and spoke of the aims and work of the Federation of Catholic Colleges Clubs, of which Technology is a member.

Dance Festival Plans
At a Matinee meeting following the day's work, the Administration of Industrial Foundation of German Kayser & Monteser held the annual Christmas Communion and Christmas at St. Mary's church, Cambridge, on Sunday afternoon, December 12, at 3 o'clock.

Plans for the annual formal dance were also discussed and it was announced that the dances this year would be held sometime in February of the pasting Boston hotels. Albert J. Kiley '20 was elected chairman of the dance committee.

Simplex Wire and Cable

Simplex Wire and Cable is used in Colleges, Technical, Apprenticeshops, and other places where dampness prevails and a flexible cable cord is needed.

Musician's Start Practice
Under Director Howard
With 12 men out and an exceptionally well-balanced supply of instrumentalists the orchestra's programs are very good. The Director, who has been entirely responsible for the success of Tech, has prepared the orchestra for the last ten Tech Shows. The concert programs will be rendered for the last ten Tech Shows. Five men out at Walker on these days, too few to do anything at all, are nothing but a great loss in every possible interpretation. Add to this holiday weekend, such as Christmas and the end of the second term and you have a vast list of losses.

Power Eat There
One of the immediate corrections for part of the evil is to close north half, the grill room, and the Faculty room for all meals other than breakfast and special dinners when the exact number may be counted on to be present. If this could be done then the burden of the entire system would not fall on the lunches each morning.

Another drawback to the management is that they cannot count on definite number for each meal. The latter are averaging 600 men each day right up to the last day of the year at this time. This is in the loss of this type of restaurant business. It is impractical to hope to overcome the great handicap of other difficulties. However, it is possible to have a system of meet tickets good for a week at a certain rate at certain meals and in this manner the losses could accumulate from day to day on the number of men to prepare for. Of course this would really entail less difficulties as some men would want two meals; others would want three meals. And still others would want a rebate if they did not use up the book each week.

Ford is Good Quality
The food is really very good. In spite of all that is said and done you will have to admit that fact.

In the use of going and details for that it is an endless task and poor after poor of Lupino may be quoted for the wastage of the big men is very complete and may not be examined at any point. The maneuver is made from the outside of a field in which the slightest change of a man tastes just as good from a second as it does from a prime rib of beef.

But there is no use going into the details for that in an endless task and poor after poor of Lupino may be quoted for the wastage of the big men is very complete and may not be examined at any point. The maneuver is made from the outside of a field in which the slightest change of a man tastes just as good from a second as it does from a prime rib of beef.
