CHEMISTS VISIT PLANT OF MERRIMAC CHEMICAL CO.

Over 150 members of the Chemical Engineering Society visited the plant of the Merrimac Chemical Company last Tuesday. Professor Fordham accompanied the men who took the trip. Although the plant was not working full force, it will be a clear spring day, so that the men but get a good idea of the equipment. The department of industrial Chemistry plans to have a trip by the different plants given by the men. There will be no more trips this term. It is hoped to have some allday trips next

OLD STORY AGAIN NEW

Doris Dance Has Johnson and Gaze in Battle of Music

A bright spot in the nonozeous existence of the dormitory dance will be February 20, for on that date a veritable battle of dance at Walther is promised. It has long been known that a large strafed, each other in presenting dance house, but on Dec. 21, a chance will be given to decide the better. They will then alternate for the dances and Walter is bringing along his Chateau Orchestras with additional pieces.

Special attention was also called by the committee of the planning of the Walther Memorial Committee to the effect that all members of the planning committee for the Walther memorial be notified and be asked to see that the rules are enforced and the introductions to the patrons, who are Mrs. Passano, Mrs. Ashley and Mrs. P. Frost.

BOSTON ENGINEER SPEAKS ON "TRAINING VERSUS EXPERIENCE"

The Mechanical Engineering Society number was addressed on Friday evening by Mr. M. L. G. of Dernmore and Leftear, Architects and Construction Company. The subject was "Training versus Experience," and the speaker stressed the value of a broad knowledge of mathematics and physics. "Training," he said, "teaches how problems may be solved; experience teaches what problems are worth solving." The ideas were illustrated and emphasized by the selection of personal experiences, and following the talk the speaker answered questions from various members of the society.

ADVISORY COUNCIL ON ATHLETICS LETS DOWN REQUIREMENTS FOR "T"S

(Continued from Page 1)

tion of the new season. It was with little discussion that the approval of the additions to the constitutions was secured and also of that part of the by-laws referring to the Executive Committee which is a new feature in the A. A. organization. But that part of the by-laws referring to the duties of the newly elected treasurer gives the student a chance to watch their blue pencil in great style. The composition of the by-laws of the various sections brought forth discussion. The broad meaning of the sections was often misunderstood by the graduating advisers, but after explanation and evidence of efficiency, most of the sections were passed.

Motion Defeated

It was explained at the time by Mr. F. G. Bow's Secretary of the Advisory Council that the tendency in the past year had been toward a graduate management of athletics. Quite abruptly to say bow's put this in the form of a motion, all the members for some time of an article referring to the powers of the Treasurer to "suppress all attacks." It was by the numbers of the section that the article would permit a check on the money on the various teams, and would also give the treasurer a chance to see if the money was being used for the team or not.

MURADS COST 20 CENTS for a BOX of 16 . BUT THEY'RE MURADS!

MURADS would be lower priced if we left out all or part of the 100% Turkish tobaccos of the purest and best varieties grown—or if we substituted inferior grades of Turkish tobacco.

But they wouldn't be MURADS—they'd only be Foxes!

"Judge for yourself!—I"

Special attention is called to MURADS 20c in Tin Box.
