A

YEAR ago tomorrow all Technology was saddened by the unexpected news of the loss of our great and beloved leader, Mr. George H. Southard, whose untimely death left Technology without that steady hand and forthright spirit which guided us through the storms of war and reconstruction to a final success.

They are among the number of fraternities who are taken away while at their posts of duty, so Richard Cockburn Maclaurin sacrificed his life in assuring the successful completion of the Alumni campaign which carried the Institute through the most serious and trying months of its history, leaving the new Technology, which started so splendidly endowed to continue its service to the world.

Those who remember him look back upon a year which seems quite barren in contrast to those years which were marked by his loving and faithful guidance of the Institute.

It is altogether fitting that the Institute Committee should place a wreath on his memorial, to call to mind the great sacrifice Dr. Maclaurin made for the good of Technology, to serve as a glorious inspiration for all of us.

THE BROWN BAR CLUB

EVERY morning at nine a small army of students hop off the Dudley Street cars or scurry out of the hole at Kendall Square and brave the quagmires of Amherst Street, brown bags grasped firmly in their left hands, the ground, and the thoughts centered on M 22. They have never had time to wonder whether the sign painter made a mistake on the machine-shop they pass, or if not, what, Mr. Frank cuts. Every day after their last classes is occupied in earning his way, we, as well as anyone else, have the utmost respect and admiration. It is the men who are working their way through, we feel that this poster is definitely a bad one.

NOTICED AUTHOR COMING

John Kendrick Hanz, noted author and critic, will be a visitor at the Institute this Tuesday, the guest of Reception Officer, and will address the students of the Institute. All those interested are invited to attend.

INTERFRATERNITY HOP
