COMMUNICATIONS

To the Editor of THE TECH:

Last week I had occasion to come into contact with a statement on "The Teachings of Calvin, Edgar Bury," which, upon perusal, I found the articles and saw that neither every line nor even sentence—more often than not—gave an issue which the later ones were to be made. I am sure that the last line has been out of place and thus the whole piece has evidently been cut. Consequently, I search the whole piece for the words "calm." I come to the conclusion that the last line is the only one that has been left out of place.

Why this person was reprimanded for this is a mystery to me, for he is always in the right.

Yours truly,

R.G.

SOPH HOP A SUCCESS

The South Vocaical May, which was held last night in Walker Memorial, was a great success. The committee was composed of Fenton Moyer, R. M. Wilson, and M. N. Waterman. The decorations were tastefully designed and related with the valentine idea contained in the name of the dance. The music was furnished by Hart Lane's orchestra.

LINDON'S BIRTHDAY

TOMORROW is Lincoln's Birthday. Though we do not celebrate it as a national holiday, we should then especially remember the man who devoted this country safely through the most critical years of its history. He was a true patriot, one who had faith in the future of democratic government, and who followed his vision. Without his vision and courage who can say where we would be today. The results of our good times and advantages is easy to lose faith in human nature and believe that government is a matter of individuals. Let us consider the problems he had to face, we must realize that with leaders who will think of the country before their personal aggrandizement the issues of today can be solved. It is in such men as Lincoln we should choose, though we cannot hope to find his equal.

"YES, MR. HOOVER, I HAVE"

We have all heard of the nationwide appeal to Americans to save the lives of starving children in the war-torn countries. The call is now made on us. Herbert Hoover has asked the Institute to subscribe to the European Relief Fund.

Other colleges have already given large amounts, so let us make the Techite clear that in this appeal. The vote that we are now asked to give is a worthy cause. A dinner to "The Invisible Guest," who represents the childhood of Europe, will be held next Wednesday. As this is a Technical affair, let us all come—department, fraternity, faculty—because we are ready to respond to this appeal. Remember that every dollar subscribed saves a child's life.

LET'S GO

Our swimmers are up against a tough proposition tomorrow night. The call is now on us. Herbert Hoover has asked the Institute to subscribe to the European Relief Fund.

Other colleges have already given large amounts, so let us make the Techite clear that in this appeal. The vote that we are now asked to give is a worthy cause. A dinner to "The Invisible Guest," who represents the childhood of Europe, will be held next Wednesday. As this is a Technical affair, let us all come—department, fraternity, faculty—because we are ready to respond to this appeal. Remember that every dollar subscribed saves a child's life.

OFFER TRIP TO ITALY

The Italy-America Society is offering a "trip to Italy" for the low price of $100. This price includes two weeks from March 21 to April 1, 1921, with the cost of $25 for all expenses. The trip includes three nights in Rome, with the cost of $10, and all expenses for the duration of the trip.

The trip is designed to give tourists a chance to see the beautiful city of Rome and to experience the culture of modern Italy. The party will leave from the airport on Sunday, April 1, and arrive in Rome on April 2. The price of the trip is $100, which includes all transportation, accommodation, and every measurable expense associated with the tour.

"ENGINEERING IN EUROPE"

SUBJECT OF C. E. LECTURE

E. W. Meher, editor of the Engineering News-Record, gave an illustrated lecture upon the present condition of Europe, considered from an engineering standpoint, to the Civil Engineering Society at their monthly meeting in Walker Memorial, Wednesday evening.

The meeting was attended by students from the Engineering School, many of whom were accompanied by their professors. All were interested in the subject. The lecture was delivered in a clear and concise manner, and was well received by the audience.

The lecture was well received by the audience. The members of the Engineering School were interested in the subject. The lecture was delivered in a clear and concise manner, and was well received by the audience.

IT WAS ALL A SUCCESS

On the 22nd of August last, I had occasion to come into contact with a statement on "The Teachings of Calvin, Edgar Bury," which, upon perusal, I found the articles and saw that neither every line nor even sentence—more often than not—gave an issue which the later ones were to be made. I am sure that the last line has been out of place and thus the whole piece has evidently been cut. Consequently, I search the whole piece for the words "calm." I come to the conclusion that the last line is the only one that has been left out of place.
