WHAT DR. MACLAURIN SAID 

"Dr. Nichols was an intimate acquaincted with Professor Nichols, as I have been acquainted with him at Columbia for some time, and I could not imagine a better man for the place. He is dignified in bearing, but warm-hearted, the type of man to be every person interested in the students, yet without any great familiarity. He is a man of high scientific attainments, broad human sympathy and praiseworthy personality in every way. In speaking on the quiet topic that he has chosen as the subject of his address, he has a tendency to be a profound knowledge of literature and art. I am sure that Dr. Nichols will be a profound acquisition to the staff of the institute's department of Christian social work, and I am sure you will all welcome him in the Dartmouth Christian Association, as I have been so fortunate to do."

ERNEST FOX NICHOLS

The following is the text of a telegram to THE TECH received from Dr. Nichols:

"Thank you for your kind telegram asking statement for THE TECH and the opportunity it gives me to assure you I fully appreciate the high honor and responsibility your Corporation has conferred upon me. I am delighted to greet Technology students at this time and to assure them that I shall do everything in my power to carry out the high traditions and remove of the Institute and to be a worthy successor to Dr. MacLaurin and those who were before him."

GIVE NEW COURSES IN PUBLIC HEALTH

The initiative and ability of the Massachusetts Institute of Technology's policy committee in keeping with the vital public welfare is shown in one of its attempts to be given in the summer session for the first time this year. This is the course in the methods of teaching hygiene and public health in the primary schools to be given by Dr. E. G. Turner, M. A., C. P. H. S., assistant professor of biology and public health in the Institute. The State Board of Health and the Institute School Board Committee have given official sanction to the course and will advertise it widely and the Boston School committee, as was the case last year, to be given in the freshman class.

T.C.A. OFFICERS FOR NEXT YEAR ELECTED

A. Johnson '22, Wins Highest Office—G. P. Shumacker '22 and G. W. Potter '22 also Get Place on Cabinet

FIVE HUNDRED VOTES CAST

Further evidence of the Massachusetts Institute of Technology's policy in keeping with the vital public welfare is shown in one of its attempts to be given in the summer session for the first time this year. This is the course in the methods of teaching hygiene and public health in the primary schools to be given by Dr. E. G. Turner, M. A., C. P. H. S., assistant professor of biology and public health in the Institute. DIPLOMAT AS WELL AS SCIENTIST—ROSS

Dr. Nichols, during his seven years as president of Dartmouth, has made the institution into a simple yet efficient organization with unprecedented results. He is a man of high scientific attainments, broad human sympathy and praiseworthy personality in every way. In speaking on the quiet topic that he has chosen as the subject of his address, he has a tendency to be a profound knowledge of literature and art. I am sure that Dr. Nichols will be a profound acquisition to the staff of the institute's department of Christian social work, and I am sure you will all welcome him in the Dartmouth Christian Association, as I have been so fortunate to do."
