DELEGATES FROM 35 COLLEGES SIGN UP FOR CONFERENCE

Changes Are Made in Executive Committee—Dean Burton and Dr. Talbot to Make Welcoming Addresses to Assembly

PROGRAM TO BE PUBLISHED

Of the 130 delegates expected at the Intercollegiate Conference, 119 have definitely made known their intentions of attending. These representatives, four from each college, will come from the following institutions: Amherst, Williams, Wesleyan, Trinity, Yale, Harvard, Princeton, Dartmouth, Penn. State, Columbia, Cornell, Lehigh, Washington and Lee, Bowdoin, Brown, Stevens Tech. Technology, Carnegie Tech., Purdue, M. A. C., Ohio State, and Universities of West Virginia, Indiana, Pennsylvania, Pittsburg, Virginia, Maine, Vermont, North Carolina, Illinois, Michigan, Wisconsin, Chicago, Iowa State and Missouri.

The delegates will arrive in Boston Friday, April 15, and during the morning will register and receive assignments to their accommodations, in the main lobby of Walker Memorial. At 1.30 o'clock the conference will assemble in room 10-250, where Professor Talbot and Dean Burton are to deliver welcome addresses. R. H. Smithwick '21, president of the Senior Class, is to speak for the undergraduates.

Changes have been made in the membership of the Executive Committee of the Conference, because of various disabilities of the men form-

T. E. N. FEATURES NEW INSTITUTE PRESIDENT

Autographed Photograph of Dr. Nichols on Cover—Professor Shimer Presents New Ideas on Evolution

CO-EDS ALSO INCLUDED

From cover to the back, the latest issue of the T. E. N., which will be out tomorrow, features Dr. Nichols. The cover is an autographed photograph of him while the book contains a story which, the board believes, will place him in a new light. "Such things as his attitude to the students and his views on the relation of the professor and the student are included. There are also extracts from his inaugural speech at Dartmouth.

Another article, which will be especially interesting to the members of the Sophomore Class, is the article on "Man's Upward Climb" by Professor Shimer of the Geological Department. This is a somewhat more detailed discussion of the subject of evolution, and several new ideas are given concerning this topic.

The Co-eds are also to share the issue under an article entitled "Are Co-eds Inhuman?" It is expected to sell many copies on the strength of this article. It is the third of a series and is a follow on "Are Tech's Professors Inhuman?" and "Are Tech's Students Inhuman?"

Elections have just been announced. E. A. Ash '22, Advertising Manager; Joe Saunders '23 and H. D. Werner, Assistant Advertising Managers, while R. A. St. Laurent '21 and W. H. Rose '21, have been chosen members of the Advisory Council of Associate Editors.

WALKER COMMITTEE MEETS

There will be a very important meeting of all men, who have at any time been out for the Walker Memorial Committee in the library at 5 o'clock today.

CLASSES VOTE TODAY

Voting for all positions in the three lower classes is being done today in the refrigeration laboratory; the list of nominees will be found elsewhere in this paper. The committee hopes that a large number of men will vote as this makes the men elected more representative of the general desires of the class than it would otherwise be.

CREW MAKES CUTS

Reduces Complement to 70 Varsity and Freshmen

The wielding of pens and pencils by Larry Davis' corps of assistant crew managers has resulted in the reduction in the number of Technology oarsmen shipping from the B. A. A. boat house to 70 men, half of these being on the varsity squad, the others being listed for the freshman combinations. The cut was made on the basis of attendance and the form shown by the men while out in the shells. The arrival of the launch to be used by Coach Pat Manning and his assistant, Howard Keppel '23, has again been delayed, so that another week will probably elapse before it will be churning up the water of the Charles.

The fraternities began practice for the interfraternity regatta on Sunday, when they went out for short spins in Technology's four oared shells. A ruling has been made to the effect that no men on the first or second Varsity, or on the first freshman eight will be eligible to row in this regatta. Inasmuch as the varsity and freshman oarsmen are well distributed among the various Greek letter societies, most of the fraternity crews will have the benefit of being coached by seasoned rowers.

The shipment of the motor boat which will be loaned to the crew management during the rowing season has been delayed on account of the fact that it was necessary to make several repairs before the launch could be used for the purpose desired here. Practically all the changes have now been made, and the boat probably will be shipped from New Haven by motor truck at the end of this week.

TWO JUNE CLASS REUNIONS

The class of 1916 will hold its big fifth year reunion in June. Into two days, June 10 and 11 the committee is planning to crowd a week of fun and "get-together." The reunionists are invited to bring the family along. There will be ample accommodations.

Holding their thirty-fifth reunion, the class of 1886 will also gather in Boston. The exact date in June is not announced.

X-A INVESTIGATED BY FOREIGN SCIENTIST

Dr. H. I. Waterman, in Charge of Delft, Holland, Technical School Investigates Method of School of Chemical Practice

NEW CLUB HOUSES CONSIDERED

Doctor H. I. Waterman, director of the technical college at Delft, Holland, the Technische Hoogeschool aan Delft, recently inspected the Everett plant of course X-A. He is in this country making a tour of all of the major institutions in view of determining the best methods of teaching engineering. He seemed very favorably impressed, not only with the advantages the course offered to the students, but also with the fact that the plants of this country are so open-minded as to permit the students to study thoroughly their methods of manufacture. He made many remarks about these points, repeating them often.

Dr. Waterman is an authority on old world education and is a man very learned in the sciences. He went over the work of the students very minutely and made especial

M. E.'S HOLD BANQUET

New Officers to be Announced at this Gathering

The new officers of the Mechanical Engineering Society for the coming year will be announced at its annual banquet to be held Friday evening, April 8. An extensive entertainment is planned. Mr. Loni, editor of "Power" will give a short address, and during the evening further entertainment will be afforded by Mr. Armom, a professional entertainer. Professor Miller is expected to be present and it is hoped that he will address the gathering. A big feed is promised to all members who plan to attend. There will be music by Robbin's Band. This event terminates a very active season for the Mechanical Engineering Society and it is expected that it will be a big success.

THIS WEEK LAST CHANCE TO GET TECHNIQUE 1922

Holders of Unredeemed Sign-Ups May Now Obtain Year-Book

Contrary to expectations, there are still a few copies of Technique obtainable. Those who failed to redeem their sign-ups may obtain a copy this week by presenting their sign-ups with \$2.50. Copies of the book will not be available to those who have no sign-up, and no one can obtain a copy after this Saturday. The booth in the main lobby, will be open every day this week from 12 till 2 o'clock.

STUDENT INJURED

Auto Smashes Into Three Other Vehicles

John R. Haines '23, a member of Course XV, is in a Boston hospital suffering from injuries incurred when he lost control of the car he was speeding across Harvard Bridge last Friday night. The car crashed into three other vehicles, injured two persons, and so badly hurt a horse that officers had to kill it. Haines was driving across Harvard Bridge, when he struck and splintered into kindling wood, a wagon driven by Max L. Shuman of 44 Green street. Shuman was thrown out and suffered injuries to his leg. His horse was so badly hurt that there was nothing to do but shoot it.

The car, slatting across the bridge grazed the rear fender of an auto coming from Cambridge. A man driving another car toward Boston, came along just in time to be struck by the wild auto, and was badly shaken

Work For Sleuths Brought To Light

Ye sleuths and would-be followers of the great Sherlock Holmes take notice: The T. E. N. has received a very mysterious-looking bill, which might prove well worth the attention of readers of cryptograms. It reads as follows:

"Sold to Tech Engineering News
1 H. T. Head \$4
1 H. T. Portrait 4
1 L. P. Bones 4

What dark meaning might there lie hidden beneath those words "H. T. Head" and "L. P. Bones"? Are these the bones that are heard clicking dismally in dark corners of the Dorms in the still hours of the night? If a foul deed has been committed it should be unearthed and reported to the Superintendent of Buildings and Power as soon as possible. All those interested in unravelling the mystery report to room 7-11 on April 31.

ELECT CLASS OFFICERS FOR COMING YEAR TODAY

Balloting in Refrigeration Laboratory Lasts to 5 O'clock This Afternoon—Juniors, Sophomores and Freshmen Vote

160 NAMES INCLUDED IN LIST OF NOMINEES

Class elections are being held today between the hours of 9 and 5 o'clock in the Refrigeration Laboratory, room 3-115. Officers for the Junior, Sophomore and freshman Classes, including a president, vice president, secretary, treasurer, two representatives on the Institute Committee and two members of the Executive Committee, will be chosen. The names of the nominees as they will appear upon the ballots follow:

CLASS OF 1922

President, Charles E. Brokaw, Donald F. Carpenter.
Vice President, Richard J. Bard, Duncan R. Linsley, E. J. Thimme, A. R. Tonon, Victor Wolf.
Secretary, John W. Church, Leland K. Cowie, Henry C. Gayley, Broder-

PRESIDENT NICHOLS PREPARES PROGRAM

Can Make Few Statements as to Policies as Yet—Is Now at Nela Park, But Will Come to Boston July 1

IS EMINENT SCIENTIST

Technology's president-elect, Ernest Fox Nichols, issued the statement last week, "I am turning over in my mind a number of ideas that have to do with the policies of the institution." He went on to say, however, that it was a little early as yet to say anything very definite regarding the plans for the near future. President Nichols, now at Nela Park, the research laboratory of the National Lamp Works, will not be able to take over his new position until about July 1.

Has Benefited Science

Dr. Nichols' scientific work has been of worldwide importance. He was president of Dartmouth for seven years, and since then has done valuable work as head of the physics department at Yale. During the war he was engaged in government work, the exact nature of which has necessarily been kept secret, and is now connected with the purely scientific research for the National Lamp works. In this connection he has been instrumental in some of the most remarkable optical work of the

EDDY LECTURING AT AMERICAN COLLEGES

Working Eastward from Pacific Coast, Addressing Students—Demands on Time Become Greater and Greater

JUST LEAVING COLUMBIA

Having completed his tour of Europe in which he gathered much knowledge in regard to practical labor problems, Sherwood Eddy who will deliver a series of lectures at the Institute next Tuesday, Wednesday and Thursday, at once began giving addresses to the students of this country. After the trip along the Pacific Coast, he has been spending the earlier months of this year working eastward, lecturing at the middle-western and eastern colleges.

In January he spent 16 days on the Pacific Coast, during 14 of which he lectured 27 times before the student bodies of nine universities, including the Universities of Oregon, Washington, California, Leland Stanford and others. At Washington the largest student audience greeted him, there being 3000 present. At the University of California in four consecutive

WHO'S WHO at Technology

The officers of the Sophomore Class are:

President: John R. Sheffield, Jr., 44 The Fenway, Boston Tel. B. B. 3515.
Secretary: Arthur R. Holden, 161 Bay State Rd., Boston, Tel. B. B. 55549.

Treasurer: Daniel C. Sayre, 532 Beacon St., Boston, Tel. B. B. 54057.
Institute Committee: Palmer C. Putnam, 428 Charles River Rd., Cambridge, Tel. Cam. 5667. Marshall N. Waterman, 39 Bay State Rd., Boston, Tel. B. B. 55921.

Executive Committee: Joseph C. Nowell, Jr., 428 Charles River Rd., Cambridge, Tel. Cam. 5667. Henry C. L. Miller, Jr., 44 The Fenway, Boston, Tel. B. B. 3515.

The officers of the freshman class are:

President: Melville F. Taylor, 334 Harvard St., Cambridge, Tel. Cambridge 52966.

Vice-president: David Evans, 106 Sewall Ave., Brookline, Tel. Brookline 57710.

Secretary: Wilmot G. Peirce, 105 Sewall Ave., Brookline, Tel. Brookline 57710.

Treasurer: William C. Ross, 19 Bacon St., Winchester.

Institute Committee: Asa W. K. Billings, 532 Beacon St., Boston, Tel. B. B. 54057. Hugh L. Walker, 81 Gainsborough St., Boston.

Executive Committee: Herbert L. Dallas, Technology Dorms, Cambridge, Tel. Cambridge 57077. Daniel H. Keck, 484 Beacon St., Boston, Tel. B. B. 51935.

CALENDAR

TUESDAY, APRIL 5
—Class Elections, refrigeration lab.
5.00—Bible Study class, room 2-180.

WEDNESDAY, APRIL 6
7.15—Chemical Society smoker, main hall, Walker.

THURSDAY, APRIL 7
4.00—International Club mass meeting, room 10-250.
7.30—British Empire club meeting, north hall, Walker.

FRIDAY, APRIL 8
4.00—Technology Women's Association tea, Boston Students' Union club house.
5.00—Bible Study discussion group, room 2-282.
6.30—Advisory Council meeting, Engineers' club.
8.00—Civil Engineering Society dance, north hall, Walker.

SATURDAY, APRIL 9
3.00—T. A. C. dance, main hall, Walker.
8.00—Catholic Club dance, main hall, Walker.

MONDAY, APRIL 11
6.00—1911 dinner, faculty dining room, Walker.

TUESDAY, APRIL 12
4.00—Sherwood Eddy talks, main hall, Walker.

WEDNESDAY, APRIL 13
4.00—Sherwood Eddy talks, main hall, Walker.

THURSDAY, APRIL 14
4.00—Sherwood Eddy talks, main hall, Walker.

FRIDAY, APRIL 22
8.00—Dorm dance, main hall, Walker.
