MIKE HOAR HOLDS LAURELS AGAINST BILL STEDMAN

Mike Hoar's title is secure. Getting off at least as soon as the gun he put increasing distance between himself and Bill Stedman and won the 50 yard race Friday afternoon by some five yards. Couch Boutellier acted as starter, and MacMahon '22 refereed. The purse of five dollars was put up by Boutellier.

Stedman is far from through with the game, however. He believes that the distance was too short, Mike's advantage lying in the speed of his start, and wants to meet the champion over a 75 yard course. Mike is ready and anxious to take up Bill's proposition, and is even ready to run 100 yards, but has no backer. He wants to know if there isn't someone in the Institute with enough sporting blood to back the victor in a second race.

CALL TENNIS PLAYERS

Manager McGhie Issues Call for Candidates

Candidates for the Beaver tennis team will meet in room 10-275 at 5 o'clock Wednesday afternoon. All varsity and freshman candidates are asked to be at this meeting by Manager Mal McGhie. Although little is known as yet as to the new material, McGhie believes that a strong team can be turned out. A very valuable coach is L. B. Rice of Longwood, who, as an amateur, has obtained considerable distinction. He played on the team at Yale, and was runner-up in the Longwood bowl tournament last year. He is to receive no payment for his services, which are given entirely in the interest of sport, and which will not impair his amateur standing.

Broockman is Eligible

A decision of the Advisory Council on Athletics relieves all doubts as to the eligibility of Hermann Broockman, whose work on the team for the last three years has been so valuable. As captain for the past two seasons he showed good leadership, and his individual work was seen in his capture of the New England intercollegiate singles championship two years ago, and his placing in the semi-finals last season. In the doubles, Broockman and Bill Cauldwell, this year's captain-elect, were runners-up in the New England doubles championship.

AERO SOCIETY ACTIVITY RESUMED WITH TWO TRIPS

Limited Number Visits Eastern Aircraft Plant

In line with its recently adopted policy of renewed activity the Aeronautical Engineering Society this week will visit the plant of the Eastern Aircraft Corporation and also the Wind Tunnel. The party will leave the main lobby at 2:15 o'clock Thursday afternoon for the Eastern Aircraft plant, through which it will be conducted, and where those who have the desire coupled with the wherewithal to do so, may take a 10 minute hop in a seaplane at the cost of only \$10.

Since the party going on the trip will be limited to 15, those who wish to go should signify their intention by signing up on the poster placed upon the professional societies' bulletin board.

A trip to the Wind Tunnel, which is situated in Building 30 and is used in the determination of the stresses on various parts used in airplane construction and upon models of completed machines when exposed to the action of a current of air, will be conducted under the auspices of the society on Monday, April 11. Professor Warner will explain the various principles involved and the method of running the tests. Those desiring to go on the trip, which will be open to all, will meet in the main lobby at 5.10 o'clock.

TEST MOVIES AS TEACHERS

A three-reel film illustrating the history, manufacture and use of brick in America was shown at the Exeter-street theatre yesterday. This is an experiment to find to what extent the motion picture can be used in teaching, and is the result of a suggestion made by Professor Emerson to the American Faced Brick Company. The success of this experiment will be watched with interest by architects generally, and if the plan proves feasible the co-operation of architectural schools throughout the country will be enlisted in getting out more motion pictures of subjects of interest to the profession. Professor Emerson is chairman of a committee consisting, besides himself, of C. W. Kilham of Harvard University and H. Vandervoort Walsh of Columbia which will make a report to the meeting of the American Institute of Architects to be held at Washington about the middle of May.

RIFLE TEAM WINS

Gains Decisive Victory Over Harvard

An exceptional record of 498 out of a possible 500 was made by the M. I. T. Rifle Team against Princeton last Thursday in a prone position match when P. M. Johnson '21, G. E. Dean '22 and J. J. Gray '23, each made perfect scores of 100. Princeton was able to hit only 479. The standing match against Harvard, Saturday, was an easy victory for us with a final tally of 412 over 392. The freshman team is making a showing equal to the best in New England, the best shot against Harvard's aspirants being a 100 made by W. C. Blaisdell.

TENNIS COURTS READY SOON

Very little work has been done on the tennis courts so far this spring due to the fact that they have been too wet for proper rolling. Work will soon be started on them, however, and they should be in excellent condition within two weeks. The two newly constructed courts north of Walker Memorial will also be ready by that time.

Construction of the recently sodded baseball diamond, near building two, has also been held up by wet weather but it should soon be available to the team.

GRADUATES ELIGIBLE FOR ARMY EXAMINATION

The Department of Military Science has announced that all graduates of Technology or similar institutions are eligible to take examinations for second lieutenant's commission in the army. Men joining now will be exempt from all mental examinations except one to be selected by the candidate from one of the following list: Analytical Geometry, Calculus, Advanced Mechanics, Surveying.

Graduates will be allowed 80 per cent on each of the three other examinations. This mark will be averaged with the mark obtained from the mental examination. A list will be made in the order of standing in the examination. A first lieutenant receives \$2180 per year plus quarters, heat and light. After every five years of service he receives a 10 per cent increase in pay.

There are 4000 vacancies in the commission personnel of the army. As a result of these examinations 2585 of the vacancies are to be filled. Those passing the examination will be placed in the various branches as follows:

Infantry, 812; Cavalry, 35; Field Artillery, 600; Coast Artillery, 268; Engineers, 118; Air Service, 400; Signal Corps, 114; Quartermaster Corps, 35; Ordnance Department, 86; Chemical Warfare Service, 32; Philippine Scouts, 85.

For further information and application blanks Col. Christian at the Military Science Department, should be interviewed.

LITTLE PROGRESS BEING MADE ON NAVAL ARCH. BUILDING

Building Strike Settlement Still Out of Sight

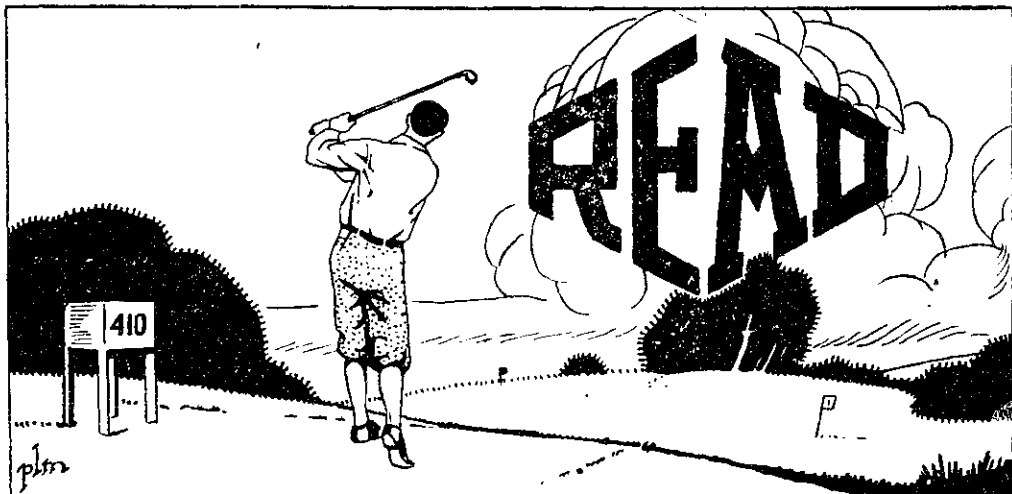

Work on the new building on Massachusetts avenue is still practically at a standstill. For a time last Saturday it was hoped that the building strike was nearing a settlement, but later developments made any expectations of a resumption of work in the immediate future extremely unlikely. Masons are needed before much more can be done in the construction work. At present there are a few men at work polishing the granolithic floors, but that is the only sign of activity about the building. It was hoped that the building would be ready for occupation this fall, but the realization of that all depends on the building strike.

DISCUSS HAPPINESS

"Happiness" was the subject considered at the meeting last Friday afternoon, of the discussion group led by Mr. C. B. J. Osborne. This group, which will meet each Friday afternoon at 5 o'clock in room R-403 of the dorms, expects this week to discuss the relation of the Beatitudes to happiness.

MR. COPITHORNE READS KIPLING AND DUNSANY

Mr. Copithorne of the English Department will read this week as usual at 6.45 o'clock Thursday evening in the Walker Library. He expects to select portions from the prose and verse of Rudyard Kipling, and from the works of Lord Dunsany. It is hoped that as many as find it possible will take advantage of these weekly opportunities to hear him.

A STORE for COLLEGE MEN

—where merchandise with character and individuality is offered by an intelligent and courteous personnel.

Tennis, Golf, Fishing, Canoes, Camping, Cameras, Guns and Sport Clothes.

Sport Suits

Read Sport Suits with knickers and long trousers offer a combination that can be worn for outing and general wear. We are Sport Specialists—our models are distinctive—essentially different from those offered by ordinary dealers

INSTITUTE NOW BOASTS OF NEW PRESS ASSOCIATION

Board is Formed to Give Technology Needed Publicity

Publicity for Technology in daily newspapers, trade journals, Sunday magazines and magazines in general through a press association was the suggestion of "Ike" Litchfield '85 at The Tech banquet last fall. Plans for putting such an organization into operation have been drawn up since then by members of the student body interested in Institute publicity, and today O. G. Williams, '22 announced that the M. I. T. Press Association is in pretty good shape and about ready to start business.

Let us keep your clothes regularly pressed.

Special monthly rates to students. Suits called for and delivered.
