THE HOSPITALITY OF TECH

TODAY the representatives of many of America's greatest colleges gather here for a conference. The actual transactions of this convention do not directly concern the vast majority but the presence of these visitors brings home to each individual Tech man a serious responsibility.

The treatment these representatives receive at our hands will determine their answer to that question. The hospitality due them is a duty incumbent on every man at the Institute. They will be lodged at the various fraternity houses but that is merely the bread and butter side of playing host.

Our guests should not be viewed as the strangers within our gates but as new friends. And as such must be made to feel our spirit of friendliness. If they are left to wander about in groups by themselves under the staring eyes of aloof and disinterested students they may admire the buildings and the equipment but they will come to the conclusion that Tech has more the aspect of a railroad station than a college.

WHERE IS 1924's PEP?

THE opportunity to enter into competition with his fellows should be welcomed by every man who intends to become a part of industry after taking up his professional life. Success comes not merely for the asking. It is attained only after a long hard race in which the contestants are many and the prizes few.

The substitution of a track and field meet for the regular gym classes during the fifth week of the term was offered to the freshmen by Mr. Kanaly. Only a small percentage of the men were willing to enter, and the idea was abandoned. The meet would have taken up no more time than the regular gym classes.

It is just this attitude toward sports that is retarding Technology in its advance toward a real college spirit. It is this attitude which makes it impossible for the Institute to take its place among the leaders in the collegiate sport world.

CHRISTIAN ASSOCIATIONS CONFERENCE AT BROWN

The annual conference of the New England College Christian Association will be held April 29, 30 and May 1 at Brown University. Among the

special speakers will be Sherwood Eddy who has just completed a series of talks at the Institute. The newly elected officers of the T. C. A. and probably the department heads, will represent Technology at the conference.

EXCHANGES

At the University of Virginia, any student attending any dance held on the campus, is considered as pledging himself that he has not touched any alcoholic beverage since noon that day. Should a violation of this pledge occur, it will be treated by the Honor Committee, as a breach of honor similar to cheating.

James Rowland Angell will be inaugurated President of Yale University on June 22, in connection with the commencement exercises. According to an announcement from the secretary's office, the ceremony will follow the conferring of the degree of Doctor of Law upon Dr. Angell.

The Yale Record is getting out a "prep school" number, all material being produced by students in preparatory and high schools. Invitations to send contributions have been distributed throughout the country. If the issue is successful it will be made an annual event.

The noted American humorist, Irvin S. Cobb, recently lectured at the University of Virginia.

Twelve hundred students of Columbia University will go to West Point to see a number of athletic matches between the two schools on May 11, if a vote on the question is passed. The faculty is considering suspending classes for the day.

The Stadium Committee at Columbia has pronounced the building of a grandstand to accommodate 40,000 people, on Riverside Drive and 116th street.

Yale's rowing season opens tomorrow, when they meet Pennsylvania on the Housatonic. The Penn crews have been practising without shifts for the past week. The Yale shell recently covered the Henley distance of 1 5-16 miles in six minutes, thirty-three seconds.

Experiments are being conducted at Princeton to determine the best set of oars to use in the shells. Ted Shay of Cambridge has made a set of 7 1/2 pound oars for the orange and Black, while eight pounders made by Ward of Philadelphia are more generally used.

Professor Albert Einstein, of the University of Berlin, will deliver a series of five lectures on his theory of relativity, to Princeton, starting May 9. The first two lectures will be on the theory, and the last two on attendant technicalities. All lectures will be translated by an interpreter.

TECHNIQUE ELECTIONS NOT ANNOUNCED UNTIL RATIFIED

The Technique Electoral Committee has up to the present time filled 11 positions on next year's board and has three more to fill. However it expects to complete its work within the coming week or week and a half at the most. The names of the men elected last will be announced when they are ratified by the Institute Committee, and until then the Electoral Committee will not divulge them.

The latest elections have been to the positions of Athletic Editor, Photographic Editor, and Grinds Editor; but as is previously stated, these will not be announced for some time to come. There are now four men on the list of nominees for Statistics Editor which was cut down from a list of seven.

CLASS IN SHIPDRAWING VISITS LAWLEY YARDS

The class in Shipdrawing 1341 under Prof. Owen made a trip to the Lawley shipyards at Neponset yesterday afternoon. About 25 men made the trip.

Through the courtesy of Geo. F. Lawley and Fred D. Lawley, superintendent of the yards and a graduate of the Institute, they were allowed to go all over the yards and to go on board several yachts which were lying in the basin. They were also taken on board a 200 foot steel schooner which was in the process of construction on the ways.

The Lawley Company has always shown great courtesy to men from the Institute who have visited their yards, and Prof. Owen stated that this had enabled course XIII men to gain much practical knowledge of shipbuilding practice.

NOTICES

for Undergraduates

Eddy Blotters may be obtained by any who did not receive them by calling at the T. C. A. office during office hours.

STUDENTS CROWD TO HEAR EDDY'S THREE MESSAGES

alone. "If a man walks off a ten story building," Mr. Eddy says, "it isn't a chance, its a cinch." You can't disregard the laws of nature and get away with it, for they will always get back at you in some form."

Form Industrial Groups

During his discussion he emphasized his main points with many vivid examples of the good or evil results that come from right and wrong living. In closing his talk Mr. Eddy appealed to his audience to be honest with themselves and try to do what was right. After the meeting Mr. Eddy met a group of men interested in a plan for summer work in the various big industrial cities of the country to study the industrial problems and to see the thing from the view-point of the worker. The idea is for the student to work as a laborer during the day and to meet in the evening to discuss experiences and problems. Big men on both sides will be prevailed upon from time to time to come and address these meetings, citing their side of the story.

Mr. Eddy introduced Mr. Cherrington, a University of California man, who last summer formed such a group from the western colleges and went to Denver to work. It is interesting to know that Mr. Cherrington and his companions were mixed up in the Tramway strike and that the three sides, labor, employer, and legal spoke before them. Information concerning these groups may be had at the T. C. A. office. At this meeting the introductory speech was made by Professor H. P. Talbot.

Discusses Philosophy of Life

At the third and last meeting yesterday, Mr. Eddy talked on a working philosophy of life. The issue, Mr. Eddy thinks, is between idealism and materialism. All science, religion, and business is founded on faith, he thinks. Materialism breaks down at every point and cannot solve the present problems. "Many a man," said Mr. Eddy, "misses his mark in life because he aims at the wrong target." Mr. Eddy further pointed out that just as the body needs food, air, and exercise to keep fit, so does the spiritual side of man need food, air and exercise.

In closing his address, Mr. Eddy appealed to his listeners to try and help world progress by being better, unselfish men themselves. After the meeting Mr. Eddy met all men having questions and problems to endeavor to aid them in the solutions of their difficulties. He was introduced at this meeting by W. B. Purinton '22, who has been managing the campaign.

To Continue Tour

Mr. Eddy left last night for Dartmouth, where he will deliver a series of talks. From there he will go to Williams and tour the rest of the

New England colleges. "Tech is a right," said Mr. Eddy, "and I am deeply touched by the enthusiastic reception I have received here." As soon as he finishes his New England tour he expects to return to the west.

T. C. A. LECTURE IN FACULTY ROOM

An open discussion on "What the Eddy Meetings meant to me" will be held in the faculty room 7.15 o'clock April 17. This meeting has been arranged by the T. C. A. and is open to all interested.

Scott's Spring Sack Suits

AND they are revised in prices as carefully as they are inspected and passed on in other vital characteristics.

With gray a prevailing color - may be conscious of its national and international responsibilities in the sobering down of prices—we offer a happy collection in this tone and a variation of it.
