TRACK TEAM SHOWING RAPID IMPROVEMENT

Times of the Handicap Meet Still a Secret but Coach Kanaly Says Team is Doing Exceptionally Well

RELAY GOES TO PENNSYLVANIA

With the Annual Interclass Meet only one week away, the track team is showing rapid improvement. No times have, as yet, been given out by Coach Kanaly but the showing made at the informal handicap meet last Saturday speaks well for a fast and well rounded squad. The time trials to pick the members of the two-mile and medley relay race teams which will compete in the Penn. Carnival on April 29 and 30 will be run off today.

Strong in Track Events

There are several good men out to capture points for the Beavers in all of the track events. In the 100-yard dash, Bossert, Hayes, and Howlett are the most promising looking candidates. In the handicap meet Bossert and Hayes were crowded together and had a bad spill in which both were considerably bruised. Ted Bossert has been out limbering up a little this week but Hayes is not expected out until today. In the 220 Poole, Downey, and Howlett are doing good work and should help Technology out with some points. Chittick, A. D. Smith, and Spitz are showing speed in the 440. Bardes, of last year's team, is showing his old form in the half mile but Borden, Stanton, and Snow are giving him a good race. Bolster, Sanborn and Gill stand at the top of the list of the milers and are developing well. Captain Billy McMahon, of course, can always be counted on for points in the two-mile run. He will wear the Cardinal and Gray in the Penn. Games when he runs in the International Two-Mile Race. Hendrie and McIntyre are doing good time over the two-mile stretch also. Merrill, Mills and Barrett are going over the high hurdles in good form and probably will chalk up some counters before the season is over. King, who won the low hurdles in the handicap meet, is doing well in his event but has Hershey and Anable in the field against him.

Men in Field Events Good

Technology is by no means weak in the field events: she will present a strong, well rounded team in all departments. Dandrow, a member of last year's Olympic Team, is easily the best man in the field sports. He will go down to the Penn. Carnival to throw the hammer. Outside of Dandrow, Dexter and Osborne are getting good distance with the weight. Dandrow will also help Boli and Blatter out with the shot and there should be no weakness here. Keller, Tonon, and Pinkham are all getting considerable distance out of the discus and will probably account for some places in the season to come. Dippel, Prescott, and Heap will be able to take care of the broad jump. Those men showing up best in the high jump are Greenough, E. A. Merrill and Pinkham. Walton, Fletcher and Sheldon are looking for places in the pole vault event.

Outlook Bright

Coach Kanaly has a strong nucleus of veterans around which he is building this year's team and, in addition, a wealth of new material. The early March vacation gave the Beavers a two-week jump on most of the other New England colleges and they have been using it to good advantage. Manager Taylor has arranged a long schedule, calling for dual meets with Harvard and Dartmouth and entrance in the Penn. Games, N. E. I. C. A. A. and I. C. A. A. A. A. meets.

MAY CUT WALKER COMMITTEE

Chairman H. M. Shirey of the Walker Memorial Committee has been considering a further cut in the number of freshman members. Mrs. King says that no such cut can be expected, to the best of her knowledge.

TECHNOLOGY STUDENTS GET TWO MEDALS IN ARCHITECTURE

Two of the seven medals awarded by the Beaux Arts Institute of Design in New York, in a competition which consisted of designing a plaza bridge, were won by students of the Technology department of architecture, according to Professor William Emerson, head of the department. The winners are L. B. Botting of Brooklyn and S. E. Lunden of Pasadena, Calif., both Seniors. Representatives of 15 institutions entered the contest.

CONFERENCE DATES FROM LAST DECEMBER

First Action Taken on Idea in December of 1920—Five Colleges Arranged Plans Before Announcements

ORIGINATED AT TECHNOLOGY

The idea of the Conference originated with Technology. Dean Burton made the suggestion before a meeting of the Alumni Council and it was taken up by the Institute Committee last November. A meeting was called of representatives from Princeton, Cornell, Dartmouth and the University of Pennsylvania, with the Technology representatives. This convention met at the University Club, New York City, December 22, 1920. There was some discussion as to the place of meeting of the Conference, and Pennsylvania was much interested in having it held in Philadelphia. Technology was finally chosen and a Technology man, W. R. Barker '21, was appointed chairman of the Executive Committee of the Conference.

Financed by Alumni Council

The question of financing the Conference was entirely taken over by the Alumni Council of the Institute. President Metcalf '90 of the Alumni Council has done much to further the arrangements, the committee states. Whether or not the Conference should be a periodic affair was also discussed at the New York meeting. No definite decision was reached, the intention being to submit the question to the entire Conference at the banquet-meeting which takes place tonight. Sentiment shown at the first discussion seemed to indicate that a repetition of the event will be probable.

The arrangements for the Conference, prior to the arrival of the delegates, was entirely in the hands of a committee appointed by the Institute Committee. This committee on arrangements consists of the following men: W. R. Barker '21, Chairman; O. G. Williams '22, printing and correspondence; Broderick Haskell '22, treasurer; D. K. Linsley '22, entertainment; H. C. Gayley '22, banquet; W. C. Roberson '22, dance; H. M. Shirey '22, accommodation.

A somewhat similar conference known as the "Western Conference" was held at the University of Missouri, April 7, 8 and 9. The committee in charge of this conference decided that plans for the assembly at Technology might well be applied to their gathering, and inquired of W. R. Barker, regarding them.

LECTURES ON STEEL TO BE GIVEN AT INSTITUTE

Part of Course on Iron and Steel 343—Others May Attend

Mr. G. B. Waterhouse, B. Met., Ph. D., metallurgist and inspection engineer of the Lackawanna Steel Co., has been secured to lecture on steel. He will deliver three addresses: The Basic Open-Hearth Process; Open-Hearth Rail Manufacture; and Steel for Drop Forging Purposes. The first of the series will be delivered Friday, April 22, from 2-3, in 10-275, the second, Saturday, April 23, 9-10, in 4-270, and the third, Monday, April 25, 10-11, in 10-275. Attendance at these lectures are compulsory for students taking Iron and Steel 343. Others who desire to attend may do so. The talks will be well worth while for all men interested in steel as an engineering material.

T. E. N. TO HAVE NEW COVER DESIGN

The May T. E. N. will appear in a new cover the composition for which closes today. As an added inducement, Professor M. L. Emerson of the Architectural department will give additional credit to those men who submit designs which are accepted.

The magazine will be on sale on the first Monday of May in its new dress and will contain many interesting articles. One of these is written by Mr. Wm. B. Parsons who built the first New York subway and is very prominent as an authority on such construction.

Although the T. E. N. does not expect to compete with Voo Doo, yet in the near future they plan to run "Student Notes," a column of current interest news, jokes, and other lively matter of a more or less entertaining nature.

FRATERNITIES BUSY

the ten guests to stay over if possible. Delta Tau Delta had a banquet last night for the guests and ladies. This evening their seven delegates will enjoy a supper and dance. Phi Sigma Kappa is taking care of seven men and there will be an informal dance there tonight. At the Phi Kappa Sigma house there was a formal dinner last night for the five guests.

WALKER MEALS WELL LIKED

The number dining at Walker Memorial is still the same as during the winter term. Usually in past years the number has fallen off considerably at the beginning of the spring term.
