### LOSE CONFERENCE WITH BIG BANQUET

Next Meeting at Philadelphia  
Two Years Hence—Results to  
Be Announced Later by Ex-  
ecutive Committee

#### SPEAKERS WELL RECEIVED

From the banquet Saturday evening which closed the Intercollegiate Conference on Undergraduate Government seemed to emanate just the spirit necessary to give the finishing touch to the work of the assembly; it is the feeling of those who attended. The addresses were clear, and for the most part, humorous; they were received by an attentive audience throughout.

No official announcement has as yet been made relative to the work done by the conference, or any conclusions arrived at, however, the transcribing of the minutes of the various meetings is now under way, and a full report of the proceedings will be published and distributed among the various colleges that participated, in the near future.

Unanimous for Quaker City Leonard Metcalf '22, as toastmaster, welcomed the guests to the affair and introduced the speakers. W. R. Barton, General Chairman of the Executive Committee of the Conference, made a few brief remarks in the form of announcements. T. C. McEachin, Princeton, moved that the Conference convene two years hence, at Philadelphia, for the second meeting. The motion was carried unanimously. Following this the visiting delegates gave a unanimous vote of thanks to Technology for the work of Institute men in carrying on the Conference.

Dr. Frank Aydelotte, president of Swathmore College, gave the address. He spoke of the university life at Oxford, remarking on the fact that there is no student government in the English colleges. A number of amusing incidents of life in the college were related by way of illustration. Particular emphasis was laid on the idea that more responsibility should be placed on the students.

The second speaker was Dr. Ed. Cummings, of the World's Education Foundation. He introduced his remarks by several humorous stories which carried his hearers through allegorical sketches of the world situation. The theme was that the great forces are Patriotism and Religion, and that future world civilization depends on a feeling of world brotherhood.

John Philipps, General Secretary of the N. E. Rotary Club, told of the business man's appreciation of the college education. Mr. Roach, of the American Red Cross, gave the closing address on some of the works of the Red Cross and the ways of service open to college men.

### OWN CONSIDERING ENROLLMENT LIMIT

(E. I. N. A.)

At the present time the question of limitation of enrollment is under consideration at Brown University. In an editorial in "The Brown Daily" the following appeared:

Brown has never been large—we do not want it to grow large—for we have seen what such institutions situated in a city become. . . . The unstable element known as the "pet-bagger" is increased—the loyalty, and quality of the personnel is diminished—and we lose some of the greatest attributes that the best of institutions give. The school on a small preparatory school of one or two hundred boys can continue to defeat teams from the largest schools is because the two hundred are integral parts of their school life; they do more than merely attend classes. The school means something to them—they give their best—and the result is something not obtainable in the class room—not gotten in a big high school—it is an attitude of spirit that means just as much to the development of a boy as

### FEDERAL BOARD CLUB HAS REGULAR DINNER-SMOKER

Dean Burton and Superintendent  
Smith Are Guests

Over 60 men, more than three-fourths of the entire membership of the Technology Federal Board Club, met at an informal dinner and smoker last Friday in the Faculty dining room. A feature of the evening took the form of special music and singing which enlivened the progress of the meal. The principal talks were made by Mr. Richardson and Mr. McCrude, who are members of the Boston Federal Board; the other guests were Dean Burton and A. S. Smith, Superintendent of Buildings and Power.

The speeches were evidently of an exclusive nature, in fact, THE TECH reporter who arrived after the dinner to report the event was politely excluded from the hall.

### RECONSTRUCTION UNIT PLANS FORMAL DANCE

Will Be Run In Walker, April  
28 To Raise Funds For Local  
Unit of American Students'  
Reconstruction Unit

#### SPECIAL ORCHESTRA ENGAGED

The formal dance which will be run on April 28 for the benefit of the Technology Reconstruction Unit is to be one of the biggest affairs held in Walker Memorial this year. A special orchestra consisting of several prominent members of New York and Boston orchestras, among whom is J. Reisman, a young drummer whose equal on the traps is very hard to find, will furnish the music. The dance will run into the wee small hours, not breaking up until 2 o'clock. Decorations for the hall are to be supplied by Technology's architects. They are to consist of paintings, drawings, and sculptures, all the work of Course IV men, and it is rumored that they are of an extraordinary nature.

The patronesses for the dance are Mrs. Cunningham, Mrs. Emerson, Mrs. Bigelow, and Mrs. Pearson. It is being run in connection with the raising of a fund of \$250,000 for the founding of a Technology unit of the American Student's Reconstruction Unit. Tickets for the affair are limited to 200 and will sell for \$3.50 per couple. They will go on sale this evening in the main lobby at 10 o'clock. Tickets can also be secured from members of the committee, a list of whom follows: J. W. Archibald, H. L. Shirley, M. J. Farren, C. C. Carven, W. M. Thomson, W. T. Ferguson, and W. R. Amon.

#### PRESS ASSOCIATION GIVES NEWS ON THE CONFERENCE

Starts Career by Handling Reports  
On Meetings

Reports from the Intercollegiate Conference were handled by the M. I. T. Press Association, which took this as an excellent chance to make its debut. A. W. Skilling '21, assembled the bulk of the copy in skeleton form. In this way the reporters got a good basis for their stories with the least possible labor.

The object, in part, of the association is to control news sources, but it is found in other colleges that the association prevents a duplication of work, and minimizes the labor of each reporter. This whole question was treated rather fully in the publications division of the Intercollegiate Conference. It appeared that Harvard had a very efficient system of press control by which all material is sent from a central bureau with a definite release date which is the same for all papers. Princeton has made the Press Club a social organization, very difficult to attain, but open to competition. At Yale there is no such rigid system of press control but public opinion exercises a very great influence on the student reporters. The discussion at the Conference has proved to be of the greatest value in the work of organizing the M. I. T. Press Association, according to O. G. Williams '22 and others interested in it.

### G. E. BROKAW ELECTED PRESIDENT OF T. A. C.

Is Present Treasurer of M. I. T.  
A. A.—Broderick Haskell Jr.  
Chosen Next Year's Vice-  
President—A. E. Meling to be  
Secretary

#### PROMINENT IN ACTIVITIES

C. E. Brokaw '22 has been selected by ballot to lead the Technology Athletic Club, as president, next year as a result of the election of officers held last Monday. Broderick Haskell Jr., '22, was chosen vice-president and A. E. Meling '22, was elected secretary for next year. These elections are subject to ratification by the Institute Committee.

Brokaw is a member of the Beta Theta Pi fraternity and Beaver. He was a member of the 1922 relay team in his freshman year. He was captain of his class football team in 1923. Last year he served on the Technique Electoral Committee and the Finance Committee.

Haskell is a member of the Phi Gamma Delta fraternity, Beaver, and the Masque. He was connected with the business department of Tech Show for two years and was assistant to the general manager last year. He is on the Point System Committee, and chairman of the T. A. C. entertainment committee.

Meling is a member of the Delta Upsilon fraternity and Beaver. He was on the Technique Electoral Committee and portfolio editor of Technique.

#### ARCHITECTURAL HUMANITIES IS NEW COURSE IV STUDY

Broad View of Profession Is Aim  
of Course

A course in "Architectural Humanities" is being introduced by the Department of Architecture to give students in the department a more comprehensive view of their profession. These lectures, which are under the direction of Professor Emerson, are being given Friday afternoons during April and May in the new Common Room in the Rogers building on Boylston street. A general introduction to the series was given on March 25 by J. Randolph Coolidge, who reviewed the modern architecture of the last six years. Other lectures are planned as follows: April 22, C. H. Blake, Jr., on "Business Law for Architects and Builders"; and April 29, M. B. Medary, Jr., on "Town Planning." For May the following are scheduled: May 6, J. R. Coolidge on "Professional Standards," May 20, C. H. Whitaker on "Building Guilds"; May 27, Professor Emerson will give a summing up of the course.

### Mike Hoar Appears In A Leading Role

The movies of Technology's handicap track meet on April 9, taken by the International News Service, were shown last week at the Modern and Beacon theatres. Mike Hoar easily walked away with the honors, getting into the picture six or seven times.

The finish of the three hundred and fifty yard dash and of the low hurdle race were both given, along with views of the second lap of the three-quarter mile run. The pole vaulters were shown in action but only one man appeared to clear the bar. The movie man missed the most exciting event of the afternoon when he failed to catch the spill taken by Al Hayes and Ted Bossert in the eighty yard dash.

Mike's appearance in the movies is in line with his recent cleaning up of Pa Stedman. The date for the next race between these two looks to be about as far off as the Dempsey-Carpenter match. Mike still claims that he didn't jump the gun in his recent victory, but even stood on the line after the starting signal was given.

## ARMY ORDNANCE SCHOOL ESTABLISHED AT INSTITUTE

Instruction In Ordnance Design Now to be Given  
Here In One Year Course Followed  
By Practice at Arsenal

#### RECOGNIZE WORTH OF INSTITUTE TRAINING

The Ordnance School work, which has been given at the Aberdeen Proving Ground, Maryland, will be conducted at Technology from now on. The course for the Ordnance Officers has consisted of one year at the Aberdeen School, and then a year at the Watertown Arsenal, in connection with which three courses were given here at the Institute. Because of the earnest efforts made at the Institute, and the interest shown by the Faculty, especially Professor Edward F. Miller, head of the Department of Mechanical Engineering, it was felt that the courses could be combined at less cost to the Government, and that the principles used in designing, and their practical application could be taught more efficiently at an institution such as Technology.

### COSMOPOLITAN CLUB MAKES NOMINATIONS

Many Nationalities Appear In  
List of Nominations For  
Next Year's Officers—Ballots  
Ready on May 1

#### HARE SYSTEM TO BE USED

Nominations were made for next year's officers of the Cosmopolitan Club at a meeting of the entertainment committee held Saturday afternoon. Independent nominations may be made by any five members. They must be in on or before April 27. Ballots will be mailed to all members of the club by May 1, the Hare system of balloting being used. One of the objects of the Cosmopolitan Club is the promotion of a feeling of friendship between the various nationalities represented at Technology. In furtherance of this idea, the list of nominees contains representatives of ten different nationalities.

In the election for president the man having the second largest number of votes will be first vice president, and the third man will be second vice president.

#### LAST OPPORTUNITY TO HEAR MR. COPITHORNE'S READING

Humorous Program Planned for  
Tomorrow Night

Humor is the keynote of the next reading which Mr. Copithorne plans to give in the Walker Memorial Library tomorrow night. Selections from Mr. Dooly and Mrs. Gassal, should prove an attraction to many students of English literature especially as presented by Mr. Copithorne. This will probably be the last opportunity to hear Mr. Copithorne this year. The reading will start at 6.45 o'clock as usual.

#### EDDY HAILED AT DARTMOUTH

Sherwood Eddy left Thursday night at 9 o'clock for Dartmouth where he expects to spend three days in addressing student gatherings. It is hoped by those who know Mr. Eddy that as large a number of people will have the opportunity of hearing him as did at Technology. From there he will go to the University of Vermont and on April 28 he will speak before the student body of Worcester Tech. On April 29, he will address a gathering at the Officers Training Conference at Brown, and will then tour the large middle western cities in behalf of the Chinese famine fund. Some time in May he will address the students at Williams and will then go to attend the Eastern Student Conference at Silver Bay, Lake George.

Until now the course has consisted of two parts, the first year at the Aberdeen Proving Ground, at which the Design of Ordnance was studied, and the second year at the Watertown Arsenal which was shop work and practical work in the laboratories. In connection with the work at the Arsenal at the present time courses in Machine Tool Work, Heat Engineering, and Engine Laboratory are given at the Institute. It was mainly because of the satisfaction of the Department with the training now given the men here, that the decision was made to give the men the other training here, also.

#### Spend Year at Institute

Special courses have been mapped out for the men who will take the Ordnance work here. These special courses will be given in Applied Mechanics, Chemistry of Powder and Explosives, Practical Electricity and Design of Carriages, Guns, Projectiles and other Ordnance equipment.

The men will spend from July 5 to May 5 at the Institute. This will be followed by a year at the Watertown Arsenal, where the men will go into the Shops, and under the direction and instruction of the foremen and superintendents, will learn the practical side of the work. They will be given practical work in moulding.

### WHO'S WHO At Technology

The Sophomore Class Officers for 1921-1922 are:  
President: Arthur J. Kemp, 106 Sewall Ave., Brookline. Tel. Brookline 57710.  
Vice-President: Daniel H. Keck, 484 Beacon St., Boston. Tel. Back Bay 51935.  
Secretary: Helen W. Hardy, 236 Auburndale Ave., Auburndale.  
Treasurer: Wilnot G. Peirce, 106 Sewall Ave., Brookline. Tel. Brookline 57710.  
Institute Committee: Lynn P. Marsh, 484 Beacon St., Boston. Tel. Back Bay 51935; Earl S. Bates, 33 Dimmock St., Quincy.  
Executive Committee: Charles M. Phelps, 106 Sewall Ave., Brookline. Tel. Brookline 57710; G. F. Eaton, 161 Bay State Road, Boston. Tel. Back Bay 55549.

### CALENDAR

Wednesday, April 20

6.30—Junior-freshman Banquet, Faculty dining room, Walker.  
7.30—Electrical Engineering Society Smoker, main hall, Walker.  
7.30—Mining Engineering Society, north hall, Walker.

Thursday, April 21

7.00—Mechanical Engineering Society Smoker, main hall, Walker.

Friday, April 22

8.00—Dorm Dance, Main Hall, Walker

Saturday, April 23

3.30—(Crew 4) vs. Brown and Nichols  
3.30—T. E. N. Cover Competition Closes  
6.00—Cosmopolitan Club, north hall, Walker  
6.00—1914 Dinner, Faculty dining room, Walker
