

ENGINEER UNIT DANCE

The dance given by the Engineer Unit of the R. O. T. C. was held in north hall of Walker, on last Thursday evening. Professor and Mrs. Miller, Captain and Mrs. W. D. Styer, C. E., Professor and Miss Spofford, and Miss Alice Christian were guests of the Unit.

Favors consisting of engineer castles for the ladies and engineer hat cords for the gentlemen were distributed during one of the dances by Miss Christian and Mr. Thomas.

There were 102 present and the evening was very enjoyably spent by members of the Unit and their guests who will be at summer camp with them in June.

FRESHMEN BANQUET TOMORROW EVENING

(Continued from Page 1)

are having an attractive program printed, and have arranged four speeches for the evening.

Arthur Kemp, the class president, is to act as toastmaster of the banquet and will introduce the following speakers in the respective order: Professor Rogers, who is to talk on the subject of "Getting Acquainted," Professor Talbot, whose topic is "Forty Years at Tech," and W. W. Russell '22 late president of the M. I. T. A. A., who has been given the subject of "Athletics" to talk on. Dean Burton, said to be the friend of all freshmen, has been given the position of honor as the last speaker of the evening, and will talk on "The Meaning of the Institute."

C. M. Phelps, manager of the 1924 baseball team, is attempting to arrange a game to be played immediately before the banquet. In the event of his success, the officers of the class wish to urge all men going to the affair to come out and back their team in the afternoon.

The publicity committee of the class has had charge of the advertising, and is the guilty party that posted the announcement of the banquet on the baseball back stop, much to the wrath of the Superintendent of Buildings and Power. The committee is headed by W. P. Winsor; W. Rosenwald and D. Elliott composing the remaining members.

COAST ARTILLERY UNIT HOLDS INFORMAL DANCE

A dance will be given by the students who are in the Coast Artillery Unit of the R. O. T. C. on Friday, May 20, at 8 o'clock in the north hall of Walker Memorial. The purpose of this affair is to bring together the men going to the Coast Artillery Camp at Fort Monroe, Virginia.

Shepard's Colonial Orchestra will furnish the music. Refreshments will be served and favors given out. All the officers of the Military Department have been invited to attend the affair.

The committee in charge of the dance is composed of R. E. Miskelly '22, Chairman; H. B. Sloane '22, T. H. Gill '22, C. D. Grover '22 and L. W. Codding '22.

Further notices concerning the dance will be posted on the Military Science bulletin board.

CLASS OF 1916 PLANS FIFTH ANNUAL REUNION

On Friday, June 10, the class of 1916 will congregate on the steps of the Rogers building to begin their fifth annual reunion which will continue until Sunday, June 12. The program includes a barbecue, together with a baseball game, and plenty of opportunities for the revellers to indulge in other sports.

The committee invites the '16 men to bring their families, and special arrangements will be made for those who follow out this suggestion. Acceptances of the invitation are required at the earliest possible moment, so that the committee can estimate the number for which to plan.

CALL OFF M. E. SOCIETY TRIP TO B. & M. SHOPS

The trip that the M. E. Society had planned to make to the B. & M. shops at Billerica last week was called off by the committee in charge. The reason was that these shops are running on half time and are only operating a few of the machines so that it was felt that the time spent in going through the place under those conditions would be wasted.

The society has just about finished its most successful year. Their smokers have had an average attendance of 250. The new officers are beginning to get in line and preparations for another big year are under way.

Princeton University (By E. I. N. A.)—Announcement was made that the University would race the University of California eight on Lake Carnegie on June 4.

G. E. SOCIETY ELECTS

Announce Officers for Coming Year at Banquet

The Civil Engineering Society closed their season on Friday night when about 125 members attended the annual banquet in north hall, Walker. The speakers were Dean Burton, Professors Porter and Spofford, Mr. Metcalf, and Professor C. Frank Allen, who has retired as an active member of the Institute staff.

The society voted a resolution extending its best wishes to the Dean and Professor Porter who are leaving the Institute this June.

The results of the elections held last Wednesday were announced. D. H. McCreery '21 was elected president and W. H. Meuser '22 was chosen vice-president. The secretary for the coming year is T. S. Wray '22 and R. R. Dresel '23 will assist him. The treasurer and assistant are V. C. Threlfall '22 and E. S. Averell '23. The executive committee consists of J. F. Brittain '22, K. W. Robbins '22, and G. E. Barnes '23.

An outline of this year's work was printed on the program and music was furnished by an orchestra, a quartet under the leadership of Karl Jetter '21, and special music by V. C. Threlfall '22.

PLANS FOR COMING SUMMER SCHOOL READY AT OFFICE

Annual Catalogue Announces June 18 As Opening of '21 Session

The catalogues for the 1921 session of the Summer School announcing June 18 as the opening date are now being distributed at the information office. The usual procedure in regard to summer school registration and fees will be in vogue this year and it was requested that all who intend to take courses this summer register before June 10.

The entrance requirements for the summer work are in general the same as for the regular school year for the same subjects. The work, however, is divided into four groups according to the object of the course: the first group is for those who have compulsory summer work as a regular part of their course, the chemistry groups as an example. This course is one of the first ones to start, beginning on June 18 and lasting six weeks. The second group is the men trying for advanced standing in their school work or wishing to supplement it or make up deficiencies. The third group is the courses in preparation for the entrance examinations and the fourth is an advanced group for teachers or others who are doing advanced work along the lines of research or experiment. The work of the school will be under the charge of Professor Charles F. Park who will be director of the summer school.

BUFFALO STATION OF X-A TO HAVE A CLUB HOUSE

Everett Station to be Changed to South Wilmington

It has been definitely decided that the men in course X-A stationed at Buffalo will have a club house. The Technology Club of Buffalo is co-operating with the Institute in the promulgation of this plan in the hope that, in future, the club house may be a kind of Technology center for Buffalo and vicinity. At a meeting of the executive committee of this body with Professor D. W. Wilson, in charge of the Buffalo station, the committee stated that they desired to see the club house go through and expressed the above hope.

The Everett station of the course will be changed from the Everett plant of the Merrimac Chemical Co. to the South Wilmington plant of the same concern. The reason for this change is the fact that at the latter plant, the concern manufactures many more products than at the former. South Wilmington is also the place where the main research laboratory of the concern is situated. Some of the numerous products manufactured at this place are chamber and contact sulphuric acid, nitric and hydrochloric acids, sodium metabisulphite, glauber's salt, and various kinds of alums and aluminum compounds.

OBSTRUCTING CABLE BURIED

The cable supplying electricity to the rifle range building on the eastern side of Tech Field has ceased to decorate that portion of the grounds. It has finally been taken down from its unsightly temporary supports and placed in the ground. This was done in order that the broad-jumping pit and the track might be unobstructed for spring track meets.

NEW APPOINTMENTS MADE TO 1921 HANDBOOK STAFF

Place for Insert to be Included in New Handbook

As a result of the six weeks' competition for positions on the editorial staff of the 1921 Technology Handbook, the following appointments have been made: A. J. Freihert '23, John Magee, Jr., '24, and H. M. Lyons, '24.

The adoption of the new T. C. A. constitution is being held up pending the revision of the sections relating to the handbook. Action on this matter will be taken at the cabinet meeting at 5 o'clock today.

Instead of the leather bound booklet now issued, the new form may be a leather case in which could be placed an insert with a stiff paper cover. The freshmen would be given the complete book while the insert alone would suffice for upper-classmen, which would result in a substantial saving and more men would probably carry the volume.

Nix on the "Parley-Voo" stuff!

A FRIEND of mine.
WHO COULDN'T speak.
A WORD of French.
WENT TO Paris.
AND THE first time.
HE HAD to get.
A HAIRCUT and shave.
HE PRACTICED an hour.
MAKING SIGNS.
IN THE looking glass.
SO THE French barber.
WOULD UNDERSTAND him.
AND THEN he went in.
AND WIGGLED his fingers.
THROUGH HIS hair.
AND STROKED his chin.
AND THE barber grinned.
AND FINISHED the job.
THEN MY friend thought.
HE'D BE polite.
SO HE gave the barber.
AN AMERICAN cigarette.
WHICH THE barber smoked.
AND MY friend pointed.
TO HIS mouth.
AND SAID "Likee voo."
AND THE barber roared.
AND SAID "You BET.
I USED to smoke 'em.
WHEN I worked.
IN INDIANAPOLIS.
AND BELIEVE me.
THEY SATISFY!"

HERE'S a smoke that talks in any language and needs no interpreter. Light up a Chesterfield, draw deep—and more plainly than words your smile will tell the world "They Satisfy". It's the blend that does it—and you can't get "Satisfy" anywhere except in Chesterfields, for that blend can't be copied!
