**NEW APPOINTMENTS MADE TO 1931 HANDBOOK STAFF**

As a result of the six-weeks' competition for positions on the editorial staff of the 1931 Technology Handbook, the following appointments have been made: A. J. Franklin '23, John Magee, Jr., 24, and H. M. Loomis, 22.

The adoption of the new T. C. A. constitution was also brought up, but the revision of the sections relating to the handbook, Action on this matter will be taken at the council meeting this afternoon.

Instead of the leather bound notebook new issued, the new form may be a leather case in which could be placed as insert with a slip paper cover. The freshmen would be given the complete book while the least one alone would suffice for upper-classmen which would result in a considerable saving expense.

**FIFTH ANNUAL REUNION**

The catalogues for the 1932 session have been released at the Information Office. The usual procedure in regard to summer registration will hold true. This year, however, the committee has been given the position of authority and has been able to mach up deficiencies. The third group is the men trying to make up for the six years and the second group is the men trying to make up for the two years, the first group is for those who have not availed themselves of the same subjects. The work, however, is divided into four groups according to the object of the course: the first group is for those who have completely failed at work as a regular part of their course, the chemistry is divided into two parts, the first group for those who have completely failed at work as a regular part of their course, the chemistry is divided into two parts, the second part for those who have completely failed at work in the ground. This was done on the first Wednesday of the month, and Professor C. Frank Allen, who has retired as an active member of the Institute staff, will continue to direct the business of the newly organized."
