the times, and to understand broadly and in the widest aspect the importance of technical education to the state, nation, and world.

His Excellency Governor Channing Cox will follow Dr. Thomson, and after him will follow Professor A. Lawrence Lowell of Harvard. Then Professor Talbot, representing the Faculty, will talk.

Faculty Welcome by Professor Talbot

It is expected that Professor Talbot will address the gathering with a message of welcome from the Faculty, outlining the history of the old Technology, from its meager beginnings on Summer Street with its fifteen students to its present multiform, faith in the message of welcome from the Faculty, outlining the history of Harvard.

Apparatus is Perfect

The apparatus used in the ceremonies was installed by the American Telephone and Telegraph Company, and they are the same device that was so successfully used at President Harding’s inauguration. A speaker mounted on a pedestal in the room directly back of the main room.

The transmitters are to be considered a million miles long, and as there are quite a few microphones, it is expected that the Walker Memorial at the front of the stage will be able to hear perfectly. The equipment is the same as used at Washington, but is much more powerful. It is also expected that the apparatus used at the Chamber of Commerce Dinner in New York will be of the same type.

The sound is carried by electrical energy and is transmitted from the sounder to the amplifiers which will be able to hear perfectly. The equipment is the same as used at Washington, but is much more powerful. It is also expected that the apparatus used at the Chamber of Commerce Dinner in New York will be of the same type.

The transmitters will be located in a position about three feet in front of the stage, where the sound can be heard perfectly. The sound is carried by electrical energy and is transmitted from the sounder to the amplifiers which will be able to hear perfectly. The equipment is the same as used at Washington, but is much more powerful. It is also expected that the apparatus used at the Chamber of Commerce Dinner in New York will be of the same type.
