NEXT WEEK—"THE BIG GAME"

Take Dudley St. car, get off at Huntington Av.

PRICES
Mats.—27c and 68c
Eves.—27c and \$1

FIX SUPERINTENDENT'S OFFICE

"To give the boys more, better and quicker service; that's the reason for these improvements," said Superintendent of Buildings Smith, when asked the why of the carpentry work in the offices of Power and Buildings. The inside corridor of the post office and locker key rooms has been lengthened to include two more wicket-windows. Another door has been added to the two already opening into the offices. Thus with three doors and five windows the passing-out of locker keys and mail will be greatly facilitated.

CALL CANDIDATES FOR FRESHMAN TRACK MANAGER

Freshmen who wish to go out for the Freshman assistant track manager will meet Manager M. N. Waterman '23, in the A. A. office in Walker Memorial at 5 o'clock, Tuesday or Wednesday night, next week. At the end of the first term, three Freshman Varsity assistant managers will be chosen, and also a manager for the freshman team. At the end of the year, two of the three Varsity assistant managers will be chosen as first assistant manager for the sophomore year, and one of these two will later be chosen as Varsity manager for the next year. The track manager is in charge of the cross-country, indoor track, and spring track teams. Track is Technology's major sport, and more letters are given in it than in any other sport.

SOCCER PRACTICE TO START

Practice in soccer will begin next Monday, the opening day of the new term. Both Varsity and freshmen teams will report to Captain Atahualpas '23. Manager G. E. Huffman '23 expects a most successful season. "All but two members of last year's Varsity will be back," says Manager Huffman, "and several of last year's freshman team are eligible for this year's Varsity."

Captain Atahualpas is considered by Boston sporting editors as the best full back in the inter-collegiate soccer field, and it is expected that George Collins, secretary of the New England Association Football League and a well-known soccer player, will assist the teams in a coaching capacity.

Games have been arranged for the Varsity to play Harvard, Dartmouth, Amherst, Clark and Springfield.

T.E.N. ELECTIONS

Benjamin P. Lane '23, was elected Acting Managing Editor, in charge of publication, and Robert H. Kean '23, Assistant Managing Editor, by the Managing Board of the Tech Engineering News, Tuesday. Lane was formerly Assistant Managing Editor of the Tech Engineering News, and was General Manager of Benchmark No. 2.

RULE OLD TRACK STARS INELIGIBLE

Dandrow, MacMahon and Bawden Will Not Run

FRESHMEN MATERIAL PROMISING

The track team is hit hard this year by the ruling that three former stars are ineligible. Dandrow, MacMahon, and Bawden are not to be allowed to run for the Institute on this year's team.

Dandrow is intercollegiate champion in the hammer throw. He was one of the American team at the Olympics last year, and holds the M. I. T. A. A. record in the hammer of 158 ft. 6 in. MacMahon was Captain of Cross-country last year and starred in the mile run on the track team. He has won his "T" five times. Mitch Bawden has been a dependable in the middle distances, holding the Technology record of 1m. 57s. in the 880-yard run.

Smith Will Run

Although the team has lost these former performers, still there have been a number of promising runners appear. W. L. Smith '23, who was ineligible for intercollegiate competition last Spring, but who took both of the dashes in the interclass track meet in Junior Week this year, is going to run and will be a valuable addition to the team. Some other good men are expected to be eligible also.

Schoolboy Athlete Picks M. I. T.

Technology gets this year one of the greatest schoolboy athletes of the country in the person of R. G. Hills from the Hill School of Pottstown, Pa. It was reported that he would go to Princeton, so that when he unexpectedly showed up at Technology for registration his coming was a pleasant surprise and the acquisition of Hills to Frank Kanaly's squad will be welcome.

Hills was a member of the American Olympic team at Antwerp last year. He was taken as an auxiliary, so did not compete, but was one of the only two schoolboy members of the team. Hills has a record of more than 46 feet in the shot and was credited with jumping over the high hurdles in 15 3/5 seconds last spring.

Freshman Prospects

No men are as yet out for the freshman relay team for Field Day. The freshman track team has a low hurdler and a sprinter in view who appear promising. There will be more definite information regarding track candidates as soon as the men get to the institute when it opens next Monday.

The advisory committee meets Sunday to discuss budgets and financial affairs and expects to announce plans for the year soon.

BOXING STARTS OCTOBER 19

Boutillier Will Coach Teams To Give Private Instruction

Mr. Boutillier, who for nine years has worked at the Institute in conjunction with the department of Physical Training, will resume his work here this year on October 19. He will be here from 10 o'clock until 5 o'clock on the 19th to interview the fellows in regard to the work.

Issue Call for Candidates

Call for candidates for the Varsity, Sophomore, and Freshman boxing teams will be issued at that time. Mr. Boutillier will devote four days a week to the work with the teams and spend two days a week with those who wish private instruction.

Give Private Instruction

Mr. Boutillier will make a specialty of private instruction this year. Anyone desiring instruction, whether as a complete beginner, or in the more advanced work, will be welcomed by Mr. Boutillier. He invites any who are interested to see him at the Physical Training office on October 19 from 10 o'clock till 5 o'clock. Mr. Boutillier is former New England, National, and also International Amateur Champion.

New Zealand Champ Here

The boxing team will be augmented this year with the presence of Phillips, lightweight champion of New Zealand. Phillips comes from King's College, where he has won every boxing championship since he was 12 years old, when he began his career as an amateur boxer by winning the 70-lb. championship. Between that time and the time he was 17 years old he won the championships in the 84, 128 and 140-lb. classes.

In 1919 he met May, the Auckland Province amateur lightweight champion twice, drawing the first bout, and winning the second on points in six rounds. He also K O'd Gregg, a leading lightweight, in four rounds.

Track and Football Also

Phillips' accomplishments are not all in the sphere of boxing. He has done considerable track work, has played football, and has experience in gym work. He won the all-round athletic championships of the secondary schools of Auckland Province in 1918 and 1919. In an invitation hundred yard dash on grass tracks, he made the time of 10 4/5 seconds. He may take up cross-country as he has done steeplechasing in New Zealand which is much more strenuous than what is done in cross-country work here.

He played on his college Rugby football team which met the All-Star New Zealand team.

SQUAD OF 90 HARRIERS AT START OF FALL SEASON

Prospects of a big year at Cross-country are looming up with many of last year's harriers back on the job besides 90 men who have already signed up as aspirants for the team. Captain Sanborn, Flanders, Hendrie, McIntire and Hennessy are back; and Poor, who was declared ineligible last year, is in the running this fall.

The schedule of dates as given out by Manager M. N. Waterman '23 is nearly complete. October 15, the annual Fall Handicap meet for Varsity and freshmen is to be run off at Franklin Field. On the 22d both teams meet Harvard over the Belmont Course in (Continued on Page 4.)

ANNUAL FIELD DAY (Continued from Page 1.)

The final tug-of-war last year was won by the Sophomores in 44.6 seconds.

In the relay race the Sophomores took and gradually increased the lead, their last man finishing 150 yards ahead of the yearlings' anchor man.

Previous field day records are, for football, 25-0, made by '23 against '24; in the tug-of-war, a time 15.4 seconds, made by '19 against '20; in the relay race, 4 minutes, 48 seconds, made by '21 against '22; and in the crew, a time of 5 minutes, 38.8 seconds, made by '23 against '24.

It is indeed fortunate that life is so charged with confidence and hope that fear of failure is admitted with some degree of difficulty.

RELIABLE TYPEWRITERS

First-class machines of all standard makes, \$20 up. Payments, \$5 monthly.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY aims to give thorough instruction in Civil, Mechanical, Mining, Electrical and Sanitary Engineering; in Chemistry, Electrochemistry, Architecture, Physics, Biology, and Public Health, Geology, Naval Architecture and Engineering Administration.

To be admitted to the Institute, the applicant must have attained the age of seventeen years and must pass examinations in algebra, plane and solid geometry, trigonometry, physics, history of the United States (or some other unit of history), English, French or German. Preparation in two units of a series of elective subjects is also required. A division of these examinations between different examination periods is allowed. In general, a faithful student who has passed creditably through a good high school, having two years' study of French and German, or three years of either, should be able to pass the Institute examinations. The history requirement may be fulfilled by a satisfactory certificate.

Graduates of colleges, and in general all applicants presenting certificates representing work done at other colleges, are excused from the usual entrance examinations and from any subjects already satisfactorily completed. Records of the College Entrance Examination Board, which holds examinations at many points throughout the country and in Europe, are also accepted for admission to the Institute.

Instruction is given by means of lectures and recitations, in connection with appropriate work in the laboratory, drawing-room or field. To this end extensive laboratories of chemistry, physics, biology, mining, mechanical engineering, electrical engineering, applied mechanics, hydraulics, and the mechanic arts, have been thoroughly equipped. Unusual opportunities for field-work and for the examination of existing structures and industries have been secured.

The regular courses are of four years' duration, and lead to the degree of Bachelor of Science. In most Courses the work may also be distributed over five years by students who prefer to do so. Special students are admitted to work for which they are qualified; and the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are given for resident study subsequent to graduation. Opportunity for research is offered in all the departmental laboratories, special opportunities are offered in the Course in Chemical Engineering Practice and in the co-operative course in Electrical Engineering in which the students spend part time in the industries for a combination of technical and industrial training.

The tuition fee, not including breakage in the laboratories, is \$300 a year. In addition, a student tax of \$9 per year is made besides laboratory fees.
