TECH ENGINEERING NEWS OUT MONDAY
October Issue Appeared With Many Features

SELLING METHODS NOVEL

The first issue of the T. E. N. for this year appeared Monday morning in all its glory. Selling headquarters for the issue were in an especially arranged room on the first floor of Hunt-

ing 30, just off the lobby. The booth was manned by four men, two of whom had been previously selected by the N. E. N. office. Energetic solicitors and navy blue trousers made sure everybody had a chance to buy a copy.

Monday’s issue is one of the best that the T. E. N. has handled to date, containing a well-chosen group of timely articles and appropriate editorials, that well deserves praise.

Dean Burton’s Message: Under the heading of "Traditions," former Dean Burton voices the sentiments of all of Tech alumni who have the opportunity to hear him talk. The study of Wildology Smoker. He talks about the traditions of the Tech, with emphasis on the Sophomore and freshman, prunes the list and adds new ones to it. The hope that Junior Week will add new sports to the list of his treasured.

Chemical Industries Expansion: Orville E. Proctor ’24 tells about the new Fisheries Laboratory, which recently has been established at the Insti-
tute. It will be under the supervision of the Tech Engineering News at the direction of Director Johnson. The expansion of the department will be the subject of a special issue of the T. E. N., which will be published soon.

Monthly News Department: First of the most well-organized parts of the issue is the department listing in the front. This is a list of the most recent articles in the Tech, with summaries of the best articles in current circulation. The list contains a complete list of the articles in the Tech, and it is intended to inform students of the latest developments in the field of education.

Other principal articles that have been included are those on the nursing profession, the medical profession, and the mining and geological profession. The article on the mining profession is an article on better lighting, in which he points out the dangers of bad lighting methods and industrial plants.
