COACHES OF '24 FOOTBALL REPORT MATERIAL SCARCE

"More candidates are absolutely necessary for the Sophomore football squad; present prospects are for a careful team." This letter from Coach McLeod Woodruff summarizes the '24 football situation.

Saturday's practice was the last drill. The first two days of signal practice ended the week and the squad carried it through with a snap. Woodruff, Forward Line, and his assistants began to weed out the men who are not doing their job.

The coach reports that unless '24 realizes the seriousness of the situation and responds with at least 25 men and all available football skills, a representative team cannot be built. There is but one condition for it.

A. Knights, back; George Brown, end; John McPhee, line, are among those who are doing their best so far this fall. McPhee is ineligible since he is a member of the Rowing crew. Nat Tyler,Captain, will be on the field for the first time this week after being held back by a bad foot. Dave Keene, at end, who strained his ankle in practice early this week, resumes training today.

FROSH PREPARING FOR FALL DAY GROUNDS

The first week is over and the Frosh are well started on their preparation for Fall Day. Quite a number have already turned out for track, football, and crew, but for the tug-of-war more men are needed. In the other sports still more can be used. Frosh is going strong. There is a good turnout of boys who are working hard under the coaching of W. Metcalfe '23, and several others. They will not desire. In the Sophomore meeting last week. Much more can be done after that event. In track, Hills from Hill School and Bateman from Anderson with many others are doing first rate. Thus far, from Egert. As he has a bad leg he is unable to do much. From Kanaly is well pleased with the men that have come out.

The tug-of-war is in need of about 40 more men. It is a question how many more can be used. Frosh is going strong. There is a good turnout of boys who are working hard under the coaching of W. Metcalfe '23, and several others. They will not desire. In the Sophomore meeting last week. Much more can be done after that event. In track, Hills from Hill School and Bateman from Anderson with many others are doing first rate. Thus far, from Egert. As he has a bad leg he is unable to do much. From Kanaly is well pleased with the men that have come out.

About seventy-five men have turned out for crew. Campbell of Egert is one of the most able. No actual rowing has been done as yet, but some has, not much can be ascertained as to their names or failures.

CROSS-COUNTRY TRIPS COURSE

The cross-country squad walked over the course yesterday in preparation for the Fall Day race next Saturday. The course was run by the fresh men and the Sophomore team. The course will run against Harvard on the following Saturday over the Belmont course. The course run by the fresh men this morning will be three and a half miles.

"Who Was John Hancock?"
asked Thomas A. Edison in his Employment Questionnaire.

We will pay One Hundred Dollars ($100) for the best answer to Mr. Edison's question.

The Birthplace of Hundreds of American Dyes

Here, in this completely equipped research laboratory, the very heart of our Dyes Department, Works, have been made the thousands upon thousands of institute experiments that have resulted in the production of hundreds of different colors for the benefit of American dyes.

Here today, tomorrow and in the days to come, hundreds of new dyes will be made in order to meet the demand of industrial dyers who use dyes that may eventually secure every color our present processes require, to enable our '23 mail list and that is second to none.

The making of dyes, the most complex of all industries, requires not only great resources, but vast chemical knowledge. It is fitting, therefore, that the Boston Company should be in a position to make available this chemical knowledge, experience should assume a large portion of the burden of dye makers, and be in with a self-contained dye-making organization.
