**T. G. A. DRIVE WELL UNDER WAY**

Conference of Y. M. C. A. and Y. W. C. A. in Yonkers

The campaign for voluntary contribution for the T. C. A. is going well at the beginning of this week. Only a small percentage of the men in the upper classes have been solicited for subscriptions, due to the difficulty of the canvassers seeing the men in their division. Men who have not been approached for contributions are asked to go to the T. C. A. office in Walker or see the following men listed below, who cover their courses.

In the absence of journalism, Ghostly以外的lights will reach the course.

**MUSICAL CLUBS PLAN DANCE**

Affair Will Be in Main Hall of Walker Next Week

The announcement of the first formal dances to be given by an activity in the Student Union this term comes from the Combined Musical Clubs. The affair will be in the main hall on the evening of October 30. Tickets will be on sale in the main lobby Wednesday, at 12 o'clock, at $1.50 per couple.

Some boys with a stephie orchestra will furnish the music for the occasion. Everyone coming time of law will bring with him Jacob's, the saxophone player, and Sanders, the xylophone player, both of whom are well-known in the T. C. A. The dance will last from 9 to 11 o'clock.

The object of the dance is primarily to bring the members of the Combined Musical Clubs together. However, the attendance will not be limited to members, as 200 tickets have been printed.

Pete Shipton, left tackle on the Sophomores football team, was elected captain after the Providence, Rhode Island, game, from the Virginia Military Institute.

**ARCHITECTS INVITE FROSH**

The Architectural Society announced that they will meet for the first time in Course IV, including freshmen.

**UNDERGRADUATES ASSEMBLED AT THE-ALL-TECHNOLOGY SMOKE;/FRIDAY, OCTOBER 14, 1921**

**T. A. C. OPENS FIRE**

Starts Drive for Membership to Organize Athletics

The Technology Athletic Club has opened its drive for membership, with what it's just this Technology is out to prove that it can put out more winning teams. It wants to get a lot more of us out on the field for exercise and fun, it wants to be able to provide proper equipment for the Varsity teams, and proper hospitality for visitors, in short it wants to establish the prestige that will necessarily come before athletic prowess can be attained. It will not be any easy job either. Harvard spends more than twice as much on her crew each year, as we spend for the support of fourteen Varsity teams.

C. H. Brokaw '23, president of the T. A. C., points out that when the student tax is raised, as it must eventually be, athletics will get its share if the Institute has shown interested. There might be far fewer F's if better accommodations for exercise were available now, and the troubles of the student tax, to a limited extent, might be met by the income from the student tax, to a limited extent, might be met by the income from the student tax. This year, the payment of two dollars will square the member's account with the dormitory board charges for the cheering section. At this time. The T. A. C. drive is only a temporary situation, but it is an extremely important one, where it is considered that athletics will become as important in the program of the Institute as it is at Technology.

The first purpose of the T. C. A. President Brokaw says, "in order to get the men out for the teams and give them all the help and encouragement possible. Its second purpose is to finance the teams.

"This year, the payment of two dollars will square the member's account with the dormitory board charges for the cheering section. All games except hockey."

The combined body supports this drive, the money will go directly to the aid of athletics, more stands will be put up, more contests will be sponsored, more prizes will be given, and entertainment and hospitality will be attended to. Varsity teams, thus creating good will which will benefit directly on the Institute and all its members."

**EXECUTIVE TRIP MANAGER**

**ELECTRIC TRIP MANAGER**

The Chemical Engineering Society has chosen C. C. Grover '22 as its trip manager to succeed R. H. Price '21. Grover's policy will be the same as his predecessor in seeking as many opportunities as possible to visit several chemical plants. In the past both men have toured out for each trip, two groups forming where the group will be divided into two parts, with the group meeting in the basement and the student meeting in the basement.

The meeting was presided over by R. H. Price '21, and was attended by a goodly number of students, as well as a number of visitors. The program consisted of addresses by the president of the Chemical Society, and some excellent presentations.
