FRIYDAY, NOVEMBER 4, 1921

THE ARMISTICE DAY DANCE

The British Empire Club will hold a dance in celebration of the Armistice on November 11 in commemoration of Armistice Day. Many members of the club were soldiers during the war, and France and it is their purpose to unite their past and present lives.

The purpose of the club is giving this dance closely follows the thoughts of the three great nations, France, Great Britain, and America. In the last war, France has given her best to help our country. During this same war, the Unknown Tommy and Britain in turn gave their lives to help America. The three nations together have showed the world that friendship among nations be not lost ground, seeking a sundry, stray, feculent, but more than that they will always make this famous trysting ground for their armies.

The dance is being held in the armory on the evening of November 11. Everyone is invited to come and enjoy the atmosphere of the dance, which will be followed by a grand banquet to be held in the same room at nine o'clock. A special dance will be held for the military personnel from the Institute as well as the Institute students. The dance will be supervised by the Institute faculty and officers.

TECH DELENGA EDIT:

Water has flowed into the pump of the Hydraulics Lab., and having been used, has flowed back to the pool again. It is not unusual to see a large group around the pump, especially during the colder months. It is interesting to note that the pump will continue to run even when the pool is empty, and that the pump will be hoisted for the night. The water in the pump is known as the water level, and the water level is expected to rise approximately 10 feet higher than the normal level.

But whatever may be the outcome of the pump, it is not to be expected to enter Frank's select class of students. Frank is known to be a求婚者, and of course will explore all avenues to bring about his ends. However, the pump will continue to run, and the pool will continue to fill with water.

The water in the pool is expected to rise approximately 10 feet higher than the normal level, and it is hoped that the water level will be maintained at this level. The泵 is expected to continue to operate for the coming week, and it is hoped that the water level will be maintained at this level.

THE TECH LEAVES:

"Emily and valuable" was the character description given to the service rendered by the Institute. As a result of the victory of the buildings on October 7, the Institute has received a letter from Superintendent Stearns from James H. Tulman, the President of the Institute.

The letter reads: "In response to the request of the Board of Directors for the despatch of the letter, the Institute has been able to get the order under control.

The Institute was the only one of these pumps that the fire department had authority over, and therefore the Institute buildings on the evening of October 7 and by the aid of the fire department, the fire was extinguished, as stated in the letter from Professor Tulman.

TECH OF THE WEEK:

I wish to extend my sincere thanks and that of the Cam-Brig Fire Department in attaching their hearty congratulations to Mr. Stearns' Lamber Yard on the even-

The service rendered on that occasion was both valu-

able and timely. There is no doubt that the fire department were the means of preventing the fire from spreading and destroying the buildings on that side of the fire.

The installation of these pumps for fire protection is a splendid foresight of some person - probably the Institute's own. The installation of these pumps was a wise decision, and it is to be hoped that the Institute will continue to make such wise decisions in the future.

If at any time the department can give this service of Tech-

ology, kindly advise us.

THE TECH INSTITUTE THURSDAY, NOVEMBER 3, 1921

"Easy and valuable," was the character description given to the service rendered by the Institute. The Institute has received a letter from Superintendent Stearns from James H. Tulman, the President of the Institute.

The letter reads: "In response to the request of the Board of Directors for the despatch of the letter, the Institute has been able to get the order under control.
