from the alumni would make possible, etc. If he will be made to do. All means," etc. The answer to the question, "Why haven't we a varsity football team?" At this, the biggest time of the sport. All material for publication must be re-

LIAISON

There should be closer connection than exists between the books added to the Library and the books wanted by the men who use the Library. It is made without any intention of criticism of the books that have been added. They show that they have been bought in an it-

INTERCOLLEGIATE NOTES

Professor Long of N.Y.U. is at present on leave of absence. While at this university, he is working on a book that a teacher's mind is not influenced by the grade in which he reads them. But it would be an aid in ascertaining their future requirements. If there were some way of selecting a group of books that are suitable to the student body. The titles of such books are compiled on a set of cards or in a separate card file in the library. Any student may enter the card room, where any one might examine the books. The members of the staff are familiar with the books. By means of this record the titles of such books can be added to include such as are most likely to be used.

BIG BLOWS FOR THE ALUMNI THIS YEAR. Rooted in a belief that varsity football would unite us as no other sport. Short intensive practice is considered necessary to develop a first-class varsity football team. A plan to establish a body is free from any outside difficulty. It could be put into practical operation. It is not by any means suggested that only books requested should be added to the library. It is unquestionable that many books which are sought now and are of great use would not be used for unless specifically suggested for. But it is equally certain that the inclusion of such books of new ideas that can be probably guided by the students without having to show just what are most needed to the taste of the students. The simplest way of finding out the books demanded is the installation of a record system which may freely ask for the books they want.

TECH NIGHT

The chairman and committee in charge of Tech Night are to be highly congratulated on the way the entertainment was run. The absolute failure of the last attempt has been so noticeable at other Tech Night. The people in the east and the south went the wrong way in the matter of the inauguration of the oc-
