AN ALMA MATER SONG

From time to time there comes an impromptu poly for Technology spirit or loyalty which falls on deaf ears for want of a concrete point, or at least a demonstration of spirit, which sometimes sincerely helps bring forth results. In response to a continual demand for some hitherto unorganized activities, a body of music more co-operatively minded than ourselves was established last Monday evening at the Tech, with a view to increase the enthusiasm on the part of the Tech community. (Signed) EDWARD A. ANST 72.

The Lounger has received numerous inquiries from its friends as to the progress of work coming out of the laboratories, and white photographe, instead of white phosphorus. Our inquiry was unfelt. We do not take much notice until a notice came from the Lounger that the machine was ready to be operated. We would not interrupt our work for the hundreds of activities of the Lounger, and would not devote any time to the Lounger's inquiries because we do not think our work is of sufficient importance to be delayed.

The Lounger's inquiries were directed to the chief, and not to the Lounger. The chief informed us that the machine was ready for operation, and would be test run. We were informed by the chief that the machine was ready for operation, and would be test run. We were informed by the chief that the machine was ready for operation, and would be test run. We were informed by the chief that the machine was ready for operation, and would be test run.
