whence it traveled to America. Here it was taken to a house near Boston and there its propagation began. It is said that the Society of the Friends, which is almost entirely a Quaker institution, owns the largest folk of this society in existence. The friends, who are mostly of Scotch ancestry, and are the oldest of the several religious groups that are still active in America, have always been strong advocates of education and have provided a number of schools for the education of their children. The first of these was the Camden Friends School, which was founded in 1700 and is still in operation today. The school is located in the heart of Philadelphia and is one of the oldest schools in the United States. It is a private school that is tuition-free and is open to students of all ages and backgrounds. The school is known for its rigorous academic curriculum and its commitment to providing a high-quality education to its students. It is also known for its strong emphasis on extracurricular activities, including sports, music, and the arts. The school has a long tradition of producing successful alumni, including many who have gone on to become leaders in their fields. The Camden Friends School is a wonderful example of the strong educational tradition that is a hallmark of the Quaker community and of America as a whole.
