

TAKE PICTURE OF ENTIRE INSTITUTE TODAY AT 1 O'CLOCK

Undergraduates Assemble in
Great Court with
Faculty

FIRST ALL-TECHNOLOGY
PHOTOGRAPH SINCE 1917

Will Include Everybody by
Means of Elevated
Camera

Classes will be suspended today from 1 to 1:20 o'clock so that the entire Faculty and student body of the Institute will turn out for the All-Technology picture to be taken in the Main Court at 1 o'clock. Arrangements with Professor William Emerson have been made and the architects from the Rogers building will also attend. A photograph was taken each year before Technology moved across the river, and one the first year the Institute was on this side of the Charles. Since then the custom has been dropped but the management of the Circus plans to revive it.

Gather on Main Steps

Since there will be only 20 minutes to put through the entire affair promptness is essential. The rallying point is the steps in front of building 10. The crowd of 3500 will hardly be able to get on the steps and in order that all the faces be visible in the photo, T. W. Alder '22, who is in charge, has decided to elevate the camera quite a distance above the ground.

A proof will be exhibited in a booth at the circus tonight and orders taken for copies. The picture, which will be about 40 inches in length, will sell for one dollar.

In view of the cold weather prevailing overcoats are permissible. Details are rather difficult to arrange and Manager Alder and his marshalls expect to develop their tactics on the spot this noon.

COSMOPOLITAN CLUBS HOLD JOINT MEETING

Plan to Meet Regularly at
Twentieth Century
Club

The Cosmopolitan Clubs of Harvard, Boston University, Wellesley and Technology held a meeting together last Sunday evening at the rooms of the 20th Century Club on Joy Street. The meeting was presided over by Mr. Chandler, of the Century Club. It was decided that meetings would be held regularly and a committee was appointed to make plans for them. The committee consisted of the president of each of the clubs, and two more members from each, to be chosen by the president.

Besides the business transacted, some entertainment was also provided, and refreshments were served. The entertainment consisted of music provided by some of the Boston University students, and of a talk given by Miss Reading of Wellesley, who told some old Chinese myths. The next meeting will be held some time in the near future.

T. C. A. CALLS FOR HANDBOOK CANDIDATES

There will be a meeting of all men who are desirous of becoming candidates for the T. C. A. Handbook, Friday, March 3, at 5:00 o'clock in the T. C. A. Office. As candidates for both the editorial and business departments are required, there is a splendid opportunity offered for all freshmen and Sophomores who desire excellent experience. Previous experience is not necessary as candidates will be given instruction as to how the work should be correctly done. The competition will last for five weeks.

THE ALL TECHNOLOGY CIRCUS IN WALKER TONIGHT

By Conklin

JENNINGS ELECTED TECHNIQUE CHIEF

Business Manager is Chosen
After Five Weeks of
Discussion
TO PICK OTHER OFFICERS

Monday was a prosperous day for the electoral committee. With five weeks of heated discussion behind them they elected both the Editor-in-Chief and Business Manager for Technique 1924. Donald Brownlie Jennings was elected by a three quarters majority on the first ballot taken Monday, and forty minutes later Richard Wesley Kenison was chosen as Business Manager for the coming year book.

Jennings is a native of the state of Michigan, and hails from the inconspicuous town of Grand Rapids. He entered the Institute last year with his class, graduating the previous spring from the Central High School at Grand Rapids. While at Technology he has been associated with numerous activities. He was one of the assistant publicity managers of Tech Show, and a member of the Walker Memorial Committee until his election to Technique. He also was a member of the 1924 tug-o-war team in both his freshman and Sophomore years, and is a member of the Electoral Committee.

Has Had Previous Experience

Though not associated with Technique, Jennings does not assume the office of Editor-in-Chief without past experience in such lines, a combined monthly and year book, called the Helios, during his last year at school.

Nearly twenty men have been nominated for the position of Editor-in-Chief during the last few weeks, and the electoral committee has cut down to two men several times, only finding it necessary to open nominations again. This was caused chiefly by the fact that a three-quarters vote of those present was needed to elect a man.

Kenison is a Massachusetts man, and lives in Watertown. He has been out for the business competition of Technique both last year and this year, and has won the competition both years. He was chairman of the freshman board of Technique Editors last year, and is a member of the business staff of the T. C. A. Handbook this year. The present Technique board, in a letter to the Electoral Com-

D. B. Jennings '24

mittee, strongly advised his election to Business Manager.

Keck Leaves the Chair

D. H. Keck, the president of the Sophomore class, has been acting as chairman of the meetings, ex-officio, but now relinquishes his position in favor of Jennings, it being the custom, and according to the constitution, to have the Editor-in-Chief assume the chair as soon as he is elected.

The Committee will now proceed with the election of the other members of the board, and nominations have already been made for the positions of Treasurer and Associate Business Manager. It is hoped by the committee that the entire board may be announced in a few weeks.

PROMINENT AIR MEN SPEAK AT SMOKER

Major Wolley, American Ace,
and Major Lyons to
Be Present

FLYING PICTURES SHOWN

The air service men of the Institute are holding a smoker tomorrow night for the first time. The smoker has been arranged by Major J. C. McDonnell of the Military Science Department. The speakers include several well known men in the aero world, they being Major Wolley, of the Massachusetts National Guard, Major Lyons, Corps Air Service officer and Lieutenant Moffatt of Framingham. The affair is to be held in the main hall of Walker at 8 o'clock. Music is to have a large part in the program of the evening, and several reels of movies of actual flying are to be shown.

American Ace to Speak

Major Wolley who is at present the commander of the air division of the Massachusetts National Guard and who has won the distinction of being an ace during the past war is to speak. He has to his credit seven German airplanes. Lieutenant Moffatt is a pilot at the Framingham flying field. He

COURSE XV MAN'S STAND TO BE OPEN ALL SPRING

Keegan Has Hired Senatorial
Shoeshiner

J. P. Keegan '22, a member of Course XV, who has opened a shoeshining parlor in the Co-operative barber shop, has secured as assistant a man who was formerly employed in Washington, where he had the experience of shining the shoes of senators, judges, and other men of eminence. Keegan feels that with such a record behind his assistant, he should have no difficulty in satisfying even the most particular of Technology students. The shop will be open all spring.

TECH CIRCUS HAS BARNUM'S STUNTS AND THEN SOME

Stage Everything from Hula
Dancing to Bull Fight
by Cosmopolitans

OPEN GATES TO BIG TOP
AT 7 O'CLOCK TONIGHT

Design Original Attractions
to Keep Walker Crowd
Moving

Tech Circus will open for its one night stand here at the Institute at 7 o'clock this evening. A multi-ringed affair, it will be accompanied by all the conventional sideshows known to circusedom as well as by some that promise to be entirely original. Admission to the various attractions will be gained by tickets which will be distributed free at the entrance to the circus grounds, which will be in Walker Memorial.

The vendors of pop corn, "hot-dogs," soft drinks and the like will be on hand to dispose of the wares at cost, however, the most optimistic of them figure that the expenditures of even the most extravagant of those attending the affair will not exceed 25 cents.

With the dozen side shows stationed along the sides of the main hall all in full swing at once, one will have the opportunity of seeing everything ranging from hula hula dancing to a "Museum of Unnatural History." The main ring attractions will include a jui jitsu exhibition, tumbling, and slack rope walking as well as a chariot race, the guiding principle of this last lying in the attempt on the part of the contestants to reduce the coefficient of rolling friction to a minimum.

First Vaudeville at 7:30 O'clock
According to the present plan, the main hall of Walker will be thrown

HISTORY OF THE TECH IS BEING PREPARED

Written Account of 41 Years of
Publication Nearly
Completed

The members of THE TECH staff are taking a hand at history and are undertaking a detailed and complete history of THE TECH and its relations to the Institute for the last forty-one years. The history covers the paper from Volume I, published in 1881, to the present year publication, Volume XLI. It follows the activity of the paper, making special effort to see where THE TECH has influenced, if it has, the affairs of the Institute and the undergraduates. It has been noticed that a large number of the activities of the Institute owe their origin to THE TECH.

History in Three Parts

When completed it will include this year's volume and will be used as a reference book. There will be three
